

Extension For Magento 2

Installation:

1. Extract the package and upload to app/code/ directory.
If this path not exists, please create under site root directory.
2. Go to command line, navigate to site root directory and run the following command to install the extension.

php bin/magento setup:upgrade

3. Or you can install manually as well. Open /app/etc/config.php file to your favorite PHP editor, and the below line to end of module list array.

'Clicksend_Sms' => 1,

4. And login to admin and clear the cache if installed by manual process.
5. And also you can download the package using the command below:

composer require clicksend/sms:1.0.0

php bin/magento setup:upgrade
