

### III. Setting up Cimpres Open Shipping

Navigate to **Sales -> Shipping Methods** in your shop admin configuration area. Locate and expand **Cimpres** section. Set **Enabled** to **Yes** if you want to enable cimpres fulfillment for your products. If this field is set to **No**, Cimpres orders cannot be fulfilled.

**Method Name:** This value will be used in frontend for displaying Cimpres shipping method.

## IV. Configuring Cimpress products

After setting up Cimpress Open Magento 2 extension, you can configure products for your shop.

In order to do this, navigate to your shop admin area and click **Cimpress** menu item.

Cimpress Open products grid will be displayed. Here you can **Edit** an already added product by clicking on row containing it or delete it by selecting **Delete** on right hand side dropdown.

The screenshot shows the Magento 2 admin interface for the Cimpress extension. On the left is a vertical sidebar with navigation icons for Dashboard, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Partners & Extensions. The main content area displays a table of Cimpress products. At the top right, there is an 'Add New' button. Below the table, there is a copyright notice for Magento, Inc. and a 'Report Bugs' link.

ID	Name	SKU	Mapping Type	Mapping	Artwork Type	Artwork	Qty Intervals	Action
1	Mugs - White Mug - Wraparound or Back and Front - No Color Accent inside - White (Mug)	VIP-2638	Product	24-MB01	Static	logo_mmm.pdf	1-19;20-49;50-99;100-199;200-5000	Select Edit Delete

To add a new product click **Add new** button at top of the page. Cimpress Open product form will be opened.

First thing needed is to press the “Load Cimpress Products” button, which will prefill product data into the form. A modal grid will slide in and will list available products. You can use filters to find your product easily. Once you identify desired product, click on **Use** link for that product. Once you select a product, a message will appear warning about product file dimensions to use. For quality printing you should use those dimensions.

The screenshot shows the 'General' configuration form for a Cimpress product. At the top right, there are 'Back' and 'Save' buttons. The form contains several fields: 'Name' (text input), 'SKU' (text input with a message: 'Please press "Load Cimpress Products" button'), 'Mapping Type' (dropdown menu set to 'Product'), 'Mapping' (text input), 'Artwork Type' (dropdown menu set to 'Dynamic'), and 'Artwork' (text input). A red box highlights the 'Load Cimpress Products' button. Below the 'Artwork Type' dropdown, there is a small note: '\*Static\*: Upload an image or a pdf. \*Dynamic\*: Enter path where we can find the item files. You can use following placeholders: %base\_path%, %order\_id%, %item\_id%'.

SKU	Name	Action
VIP-47739	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Orange Accents - Orange (Mug)	Use
VIP-47735	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Black Accents - Black (Mug)	Use
VIP-47736	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Red Accents - Red (Mug)	Use
VIP-47737	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Blue Accents - Blue (Mug)	Use
VIP-47738	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Green Accents - Green (Mug)	Use
VIP-47740	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Pink Accents - Pink (Mug)	Use
VIP-47741	Mugs - White Mug - Wraparound or Back and Front - White (Mug) - Yellow Accents - Yellow (Mug)	Use
SFY-1079WFY44GGH19Z	15 oz. White Mug	Use
SFY-1079TQYCTAPT5PHE	Mugs - White Mug - Wraparound or Back and Front - No Color Accent Inside - White (Mug)	Use
VIP-2638	Mugs - White Mug - Wraparound or Back and Front - No Color Accent Inside - White (Mug)	Use

After you selected the Cimpress product, Name and SKU will be automatically prefilled. You will be required then to fill following fields:

- Mapping Type (Product | Sku) - here you can select the Magento Product to which the current Cimpress Product will be matched to. You can either use the Product tab, or add the sku code (in case of magento custom options)
- Artwork Type (Static | Dynamic) - If you select Static, you can upload your artwork (image or pdf) which will be printed. If you select dynamic, the extension will search for the artwork in the dynamic folder name you add (to connect dynamic artwork - coming from an design tool for example)
