Multi Vendor DropShipping - Installation

[Back to User Guides](#)

<https://creativeminds.helpscoutdocs.com/category/1092-dropship-m1>

There are two ways to install a Magento Extension:

Install via Magento Connect

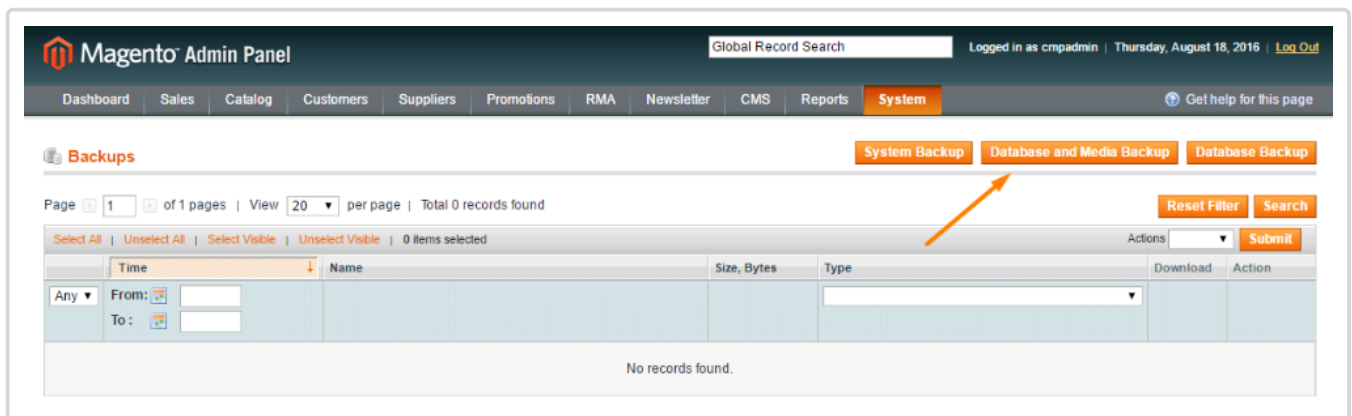

If you are unfamiliar with extensions installation via Magento Connect, please read this **article** (<https://www.cmind.com/down-to-the-basics-how-to-install-a-magento-extension/>).

Install Manually

1. Data Backup.

Backup your Data to your Magento database and web directory.

In the Magento admin panel, go to *System* → *Tools* → *Backup*.

2. Disable Compiler. (If you are running an older version, 1.4 and lower, you can skip this step.)

In the Magento admin panel, go to *System* → *Tools* → *Compilation*.

In case “Compiler Status” is “Enabled”, click on the “Disable” button.

3. **Download Extension and Extract Download.**

When you download the extension, it will appear as a zip file. Unzip extension contents on your computer and navigate inside the extracted folder.

4. **Upload Files to Magento Folder.**

Upload extension files to the main Magento folder.

5. **Clear Cache.**

In the Magento admin panel, go to *System* → *Cache Management* and press the **Flush Magento Cache** button.

The screenshot shows the Magento Admin Panel interface. At the top, there is a navigation bar with the Magento logo and 'Admin Panel' text. Below the navigation bar, there is a search bar and a user login status. The main content area is titled 'Cache Storage Management' and features two buttons: 'Flush Magento Cache' (highlighted with an orange box) and 'Flush Cache Storage'. Below the buttons, there is a table with the following columns: Cache Type, Description, Associated Tags, and Status. The table lists several cache types, all of which are currently 'ENABLED'.

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED
