There are two ways to install a Magento Extension:

## Install via Magento Connect

If you are unfamiliar with extensions installation via Magento Connect, please read this **article** (<https://www.cminds.com/down-to-the-basics-how-to-install-a-magento-extension/>).

---

## Install Manually

### 1. Data Backup.

Backup your Data to your Magento database and web directory.

In the Magento admin panel, go to *System* → *Tools* → *Backup*.

The screenshot shows the Magento Admin Panel interface. At the top, there is a search bar and user information. Below the navigation menu, the 'System' tab is selected. The 'Backups' section is active, displaying a table with columns for Time, Name, Size, Bytes, Type, Download, and Action. The table is currently empty, showing 'No records found.' An orange arrow points to the 'System Backup' button in the top right corner of the section.

## 2. **Disable Compiler.** (If you are running an older version, 1.4 and lower, you can skip this step.)

In the Magento admin panel, go to *System* → *Tools* → *Compilation*.

In case "Compiler Status" is "Enabled", click on the "Disable" button.

## 3. **Download Extension and Extract Download.**

When you download the extension, it will appear as a zip file. Unzip extension contents on your computer and navigate inside the extracted folder.

## 4. **Upload Files to Magento Folder.**

Upload extension files to the main Magento folder.

## 5. **Clear Cache.**

In the Magento admin panel, go to *System* → *Cache Management* and press the **Flush Magento Cache** button.

The screenshot shows the Magento Admin Panel interface. At the top, there is a search bar and user information. Below the navigation menu, the 'System' tab is selected. The 'Cache Storage Management' section is active, displaying a table with columns for Cache Type, Description, Associated Tags, and Status. The 'Flush Magento Cache' button is highlighted with an orange box.

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED
