

# Sales Rep Magento 2 - Installation

---

## Installation

In order to install any extension for Magento 2, the first thing to do is to create the folder '**code**' under 'app' in Magento 2 root category, as shown in the screenshot below.

In Magento 2, extension files are placed in one module folder so there is no need to copy files to different directories like it used to be in Magento 1.

The following step is to install the extension.

1. Open the console, please type: "*php bin/magento setup:upgrade*" and hit Enter.

```
php bin/magento setup:upgrade<br>
```

2. Then do the same with the command '*php bin/magento setup:static-content:deploy*'.

```
php bin/magento setup:static-content:deploy
```

After those steps, you should see that our module is enabled.

You can check it under `app/etc/config.php` on the list of enabled modules.

```
<?php
return array (
  'modules' =>
  array (
    'Cminds_Coupon' => 1,
    'Magento_Store' => 1,
    'Magento_AdvancedPricingImportExport' => 1,
    'Magento_Directory' => 1,
    'Magento_Theme' => 1,
    'Magento_Backend' => 1,
    'Magento_Backup' => 1,
    'Magento_Eav' => 1,
    'Magento_Customer' => 1,
    'Magento_BundleImportExport' => 1,
    'Magento_AdminNotification' => 1,
    'Magento_CacheInvalidate' => 1,
    'Magento_Indexer' => 1,
    'Magento_Cms' => 1,
    'Magento_CatalogImportExport' => 1,
    'Magento_Catalog' => 1,
```

The last thing that you need to do is to flush Magento cache. You can do this in two ways:

- Running in console command the command `'php bin/magento cache:clean'`:

```
php bin/magento cache:clean
```

- In the Admin Panel, please go to System → Cache Management, select all elements and click **'Flush Magento Cache'**.

Flush Cache Storage **Flush Magento Cache**

Refresh Submit 12 records found (12 selected)

<input checked="" type="checkbox"/>	Cache Type	Description	Tags	Status
<input checked="" type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	DISABLED
