Video Version

Steps

1. Downloading the File (#1)
2. Preparing the File Structure (#2)
3. Installing the Extension (#3)
4. Checking if it's Enabled (#4)
5. Flushing the Magento Cache (#5)
6. Extension's Settings (#6)

1) Downloading the File

Download and unpack the archived package for the extension, after obtaining it from either the Confirmation Email or from the User Dashboard on <http://www.cminds.com> (<http://cminds.com/>).

The screenshot shows the CreativeMinds website homepage. At the top, there is an orange banner with a sale announcement: "SALE ENDS IN 1 day 13:04:31" and "48 Hours Special Sale: 20% off our entire catalogue - Use Coupon Code --> Jan48hours -->". Below the banner is the CreativeMinds logo and navigation links: "WORDPRESS PLUGINS", "MAGENTO EXTENSIONS", "SUPPORT", "HIRE US", "BLOG", and "ACCOUNT". The main heading is "Innovative WordPress Plugins & Magento Extensions". Below this is a search bar with the text "e.g. tooltip glossary" and a magnifying glass icon. Under the search bar, there are trending tags: "WordPress Bundles", "Magento 2.X Extensions", "Multi-Vendor Marketplaces", "Custom Development", "WordPress Suite", and "MicroPayments". The main content area features a section titled "99+ WordPress Plugins and Addons FREE & Premium". Below this, there are two lines of text: "Very Popular - Our plugins for WordPress have been downloaded more than 500,000 times by WordPress users." and "Budget Bundles - We offer several Low-Priced Bundles and a Suite of all our Plugins packaged together to save you money." At the bottom, there are several icons representing different products or services: a blue folder icon, a play button icon, a blue folder icon with a person, a "ToolTip Glossary" icon, a blue folder icon, and a blue folder icon with a person. On the right side, there is a "Pre-Sales Inquiries" chat window with the text "Live Pre-sales Inquiries www.cminds.com" and "CreativeMinds Welcome to CreativeMinds! Is there anything I can help you with?"

Unpack this file before the next step.

2) Preparing the File Structure

Make sure the path **app/code/Cminds** exists, as shown below. If it doesn't, create the necessary folders.

Then, inside "Cminds" you should create a folder named "**StockNotification**" (marked in gray below). Paste the files you unpacked in the last step there.

In Magento 2, extension files are placed in one module folder so there is no need to copy files to different directories like it used to be in Magento 1.

3) Installing the Extension

Open the console and type the following commands:

1.

```
php bin/magento module:enable Cminds_StockNotification<br>
```

2. `php bin/magento setup:upgrade`

3. For Magento 2.0.x, 2.1.x:

```
rm -rf var/di
```

```
rm -rf var/generation
```

For Magento 2.2.x:

```
rm -rf generated/*
```

4. `php bin/magento setup:di:compile`

5. `rm -rf pub/static/*`

6. `php bin/magento setup:static-content:deploy`

In Magento 2.2.x, depending of the mode in which Magento is running, it may be necessary to add a "-f" flag to the end of the above command.

```
7.  chmod -R 777 pub/static
```

```
8.  For Magento 2.0.x, 2.1.x:
```

```
    chmod -R 777 var
```

```
    For Magento 2.2.x:
```

```
    chmod -R 777 generated
```

```
    chmod -R 777 var
```

4) Checking if the Extension is Enabled

To check the list of enabled modules, you can either:

- Run the command "*php bin/magento module:status*" in the console command.
- **Or** check manually in "app/etc/config.php" file.

5) Flushing the Magento Cache

The last thing that you need to do is to flush Magento cache. You can do this in two ways:

- Running in console command the command '*php bin/magento cache:clean*':

```
php bin/magento cache:clean
```

- In the Admin Panel, heading to **System** → **Cache Management**, then selecting all elements and clicking '**Flush Magento Cache**'.

Flush Cache Storage **Flush Magento Cache**

Refresh Submit 12 records found (12 selected)

<input checked="" type="checkbox"/>	Cache Type	Description	Tags	Status
<input checked="" type="checkbox"/>	Configuration	Various XML configurations that were collected across modules and merged.	CONFIG	DISABLED
<input checked="" type="checkbox"/>	Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	DISABLED
<input checked="" type="checkbox"/>	Blocks HTML output	Page blocks HTML.	BLOCK_HTML	DISABLED
<input checked="" type="checkbox"/>	Collections Data	Collection data files.	COLLECTION_DATA	DISABLED
<input checked="" type="checkbox"/>	Reflection Data	API interfaces reflection data.	REFLECTION	DISABLED
<input checked="" type="checkbox"/>	Database DDL operations	Results of DDL queries, such as describing tables or indexes.	DB_DDL	DISABLED
<input checked="" type="checkbox"/>	EAV types and attributes	Entity types declaration cache.	EAV	DISABLED
<input checked="" type="checkbox"/>	Integrations Configuration	Integration configuration file.	INTEGRATION	DISABLED
<input checked="" type="checkbox"/>	Integrations API Configuration	Integrations API configuration file.	INTEGRATION_API_CONFIG	DISABLED
<input checked="" type="checkbox"/>	Page Cache	Full page caching.	FPC	DISABLED
<input checked="" type="checkbox"/>	Translations	Translation files.	TRANSLATE	DISABLED
<input checked="" type="checkbox"/>	Web Services Configuration	REST and SOAP configurations, generated WSDL file.	WEBSERVICE	DISABLED

6) Extension's Settings

Some extensions can be enable or disabled from their settings menu as well. They are set Enabled by default.

You can check this status in the following path:

Admin Panel → **Stores** → **Configuration** → **Extension name** → **Configuration** → **General**

General

Enable
[store view]

Yes
