

Drupal Integration

Installation Guide

Steps to install **Drupal Integration** In Magento 2.2.x, 2.3.x

1. Unzip the ZIP file.
2. Make sure to create the directory structure in your Magento:
'Magento_Root/app/code/Cowell/DrupalIntegration'
3. Drop/move all of the content inside the unzipped folder to directory
'Magento_Root/app/code/Cowell/DrupalIntegration'
4. Run the command **php bin/magento module:enable Cowell_DrupalIntegration** at Magento root folder. This will let Magento know about the module.
5. Run the command **php bin/magento setup:upgrade** at Magento root folder. This will update the database schema.
6. Run the command **php bin/magento setup:di:compile**
7. Run the command **php bin/magento setup:static-content:deploy**
8. Run the command **php bin/magento cache:flush**

Note: Make sure Magento Cronjob is running in your server. See more in <https://devdocs.magento.com/guides/v2.0/config-guide/cli/config-cli-subcommands-cron.html>
