

CodextBlog Extension

Magento 2.x

1. Unpack the extension zip files.
2. Open your server File system using FTP/SFTP/SSH client and navigate to the app/code directory of your Magento 2 installation.
3. Upload the extract directory to this path.

4. Connect to your Magento 2 root directory via SSH

5. Run the following commands

- `php bin/magento module:enable Codextblog_Wbtap`
- `php bin/magento setup:upgrade`
- `php bin/magento setup:static-content:deploy`
- `php bin/magento cache:clean`

After following above step, the extension is installed.
