2. How It's Work

- Who Bought This Also Bought extension keeping track of the customer shopping trends based on past orders.

- This extension will suggest your store visitor the products which are mostly brought along with current product visitor is viewing on your store.
- For example – the visitor is on product A page. This extension will scan all the past orders of the store and display the most purchased products along with product A.
- Suppose there are ten past orders which contain the product A. This extension sort all the other products of these orders except product A based on the purchase quantity and display the products suggestions in such order that maximum purchase quantity product display at the first place in the section.
- This technique ensures efficient method and criteria to suggest only correct products.

3. How to Test

- Suppose there are four products. Let's name as A, B, C, and D.
- Select A, B, C and place first order.
- Now Select B, C, D and place the second order.
- Now Select the A, B, C, D and place the third order.
- Now visit the product page of B. Under the Who Bought This Also Bought section this extension will suggest the products in order C, D, and A.

Who Bought This Also Bought

The image shows a 'Who Bought This Also Bought' section with five product cards. Each card contains an image of the product, its name, price, and an 'Add to Cart' button. The products are: Aim Analog Watch (\$45.00), Overnight Duffel (\$45.00), Breathe-Easy Tank-S-White (\$34.00), Affirm Water Bottle (\$7.00), and Joust Duffel Bag (\$34.00). There are navigation arrows on the left and right sides of the carousel, and two small grey dots at the bottom center.
