

Installation Guide Coinremitter

Magento2.X Plugin – V1.0.3

Requirements for integration

1. For the Integration process with coinremitter users must requires to have Magento version 2.x
2. If you don't have an account on [coinremitter](#), then make sure to make it one

Installation of plugin

1. First! Download coinremitter magento plugin.
2. Magento file will download in zip file, you should unzip plugin first.
3. Make a folder in the app with the name 'code' (if not exist) then put the downloaded magento (Coinremitter) folder into the 'code' folder.
4. Now login to your server and run these following commands in terminal to install Coinremitter Plugin
5. Now the plugin is installed in your magento store, Follow below instruction to fully activate it.

- `php bin/magento setup:upgrade`
- `php bin/magento setup:di:compile`
- `php bin/magento setup:static-content:deploy`
- `php bin/magento cache:flush`

Plugin Configuration

- On the dashboard, you will see the menu on the left side, where you can see the **Store** option, click on it. Sidebar will open and click on **configuration**, afterwards a new page will appear, click on **sales** and then click on **Payment methods**.
- On that page, Scroll down and you will find Configuration option of **Coinremitter CryptoPayment**
- On the box of service you will see multiple options to fill in.
- You will find the first option Enable. Select it to **Yes**
- In the second option you can create your own **title** if you need. It will display to user on checkout page
- In the **Description** tab you can add some notes to tell your customer some meaningful things before the customer makes any step during checkout.
- Set **Exchange rate Multiplier**. Default is 1.
- Set **Invoice Expiry Time**. It is in minutes. So if you set value 30 then the created invoice will expire after 30 minutes.
- In the last tab of **Order statuses** you can select one of your own status about what you want to show to customers when they successfully make payment.

(Select appropriately because it will appear once payment gets done)

Create Wallet

Go to the menu on your left side and you'll see the **Coinremitter Checkout** option. Another sidebar will open as soon as you click on it. **Wallet** option will appear there and click on it also.

- Now you are on the **Wallet - coinremitter** page
- You'll find the **Add Wallet** button on the top of the page. Click on it.
- After clicking on the add wallet a new page will appear where you'll see multiple options like **Coin, API key, Password**.
- In the first option of **Coin** select your coin from which you want to create your crypto wallet.
- Now go to coinremitter website and login to your account and get your API key from there. If you find any trouble to get your api then [click here](#) to get the idea.
- Get back to the Magento coinremitter page and select one of your coins. Paste API key in the box and fill your Password in the box.
- Click on the **Save wallet** on top of the page.

- Congratulations! You have now successfully created your wallet.

- You can also see your other wallet list and can **Edit/Delete** your wallet by clicking on the select **option** which you can find on the **Action** field. And you also have to add the URL in the **Webhook URL** field of **your Coinremitter wallet's General Settings**. The URL can be seen down above in the image.

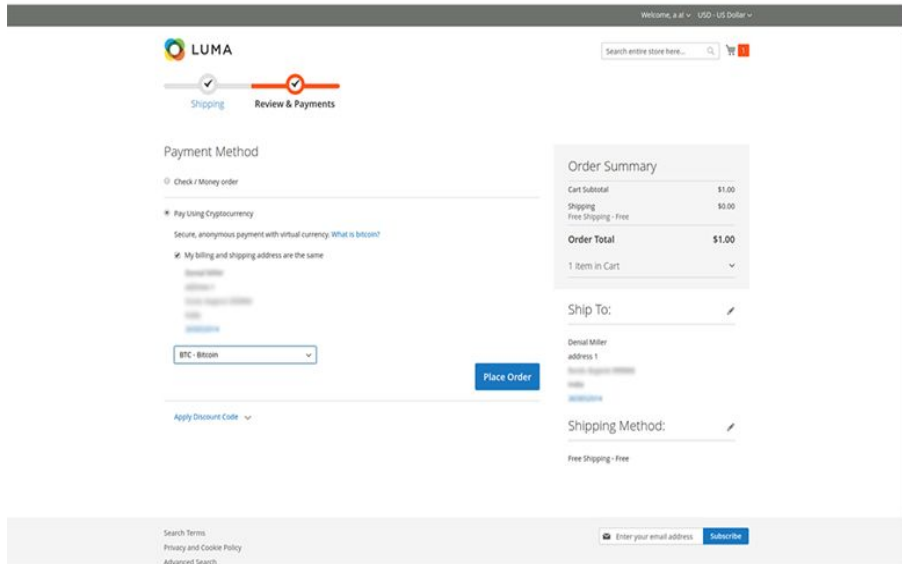

Now you have **successfully** activated coinremitter plugin.

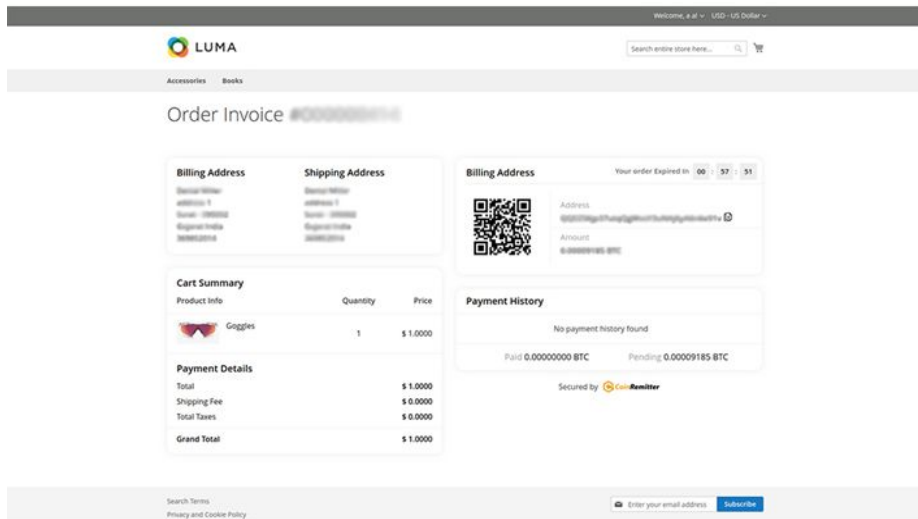

How to make Payment

- Once a customer creates an order and fills all the mandatory details, the system will take them on the payment page.
- Once a customer creates an order and fills all the mandatory details, the system will take them on the payment page.
- You will see **Pay Using Cryptocurrency** option. Click on it.

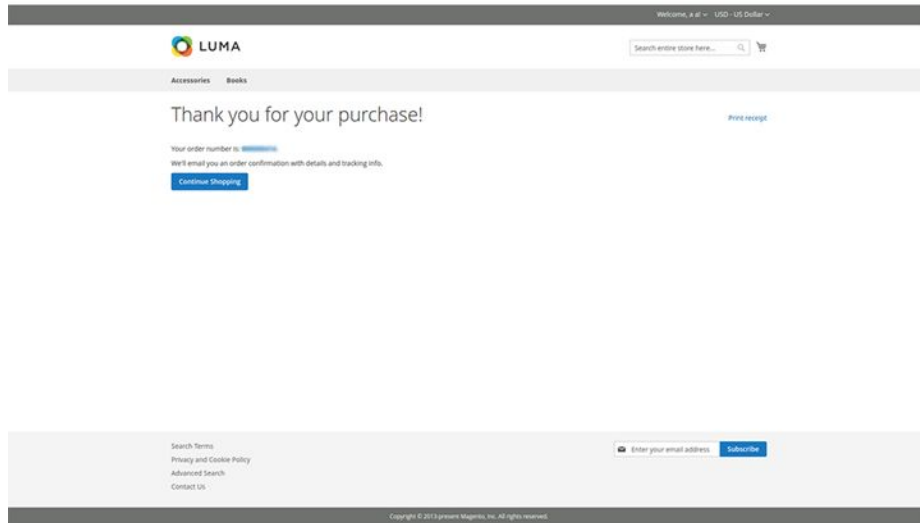

- Select one of your coin wallets from which you want to pay for your product and click on **place order**.

- On the very next moment the system will automatically create an **Invoice** which will appear on your screen

- Copy **Payment address** from generated invoice and pay exact amount from your personal wallet. Once you transfer to this address, it requires 3 confirmations to mark the order as paid. It will automatically redirect to the success page once payment is confirmed on blockchain. And you will see the following screen.

- Congratulations! You have now successfully paid for your product.

Check order details

- Go to your **admin panel** menu and click on **Sales**, sidebar opens and you must click on **order**
- Once you reach the **order** page you will see your multiple orders list. Select one of these orders. Make sure that order is paid using **coinremitter** payment option.
- Click on the **view** from one order and the new tab will open.
- On the left side menu you will see the **Payment Details (coinremitter)** tab. Click on it.
- You will see the details about payment details.
