

IMPORT/EXPORT PRODUCT RELATIONS
FOR MAGENTO 2

User Guide

Important Notice

CommerceExtensions reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice.

Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to CommerceExtensions terms and conditions of sale supplied at the time of order acknowledgment.

CommerceExtensions warrants performance of its products to the specifications applicable at the time of sale in accordance with CommerceExtensions standard warranty. Testing and other quality control techniques are used to the extent CommerceExtensions deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

CommerceExtensions assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using CommerceExtensions components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

CommerceExtensions does not warrant or represent that any license, either express or implied, is granted under any CommerceExtensions patent right, copyright, mask work right, or other CommerceExtensions intellectual property rights relating to any combination, machine, or process in which CommerceExtensions products or services are used. Information published by CommerceExtensions regarding third-party products or services does not constitute a license from CommerceExtensions to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from CommerceExtensions under the patents or other intellectual property of CommerceExtensions.

Resale of CommerceExtensions products or services with statements different from or beyond the parameters stated by CommerceExtensions for that product or service voids all express and any implied warranties for the associated CommerceExtensions product or service and is an unfair and deceptive business practice. CommerceExtensions is not responsible or liable for any such statements.

Extension Overview

This extension is designed for Magento 2 and will import and export related products, cross-sell products and upsell products. You can also import and export product positions for the related, upsell and cross-sell products. The extensions makes it fast and easy to add and/or update your product relations.

For example you can use this extension to update all products in a particular category to all have certain related products set and with the "append" feature you can either keep all existing related products and add only "new" ones or you can "clear" all existing related products and import only what you have set in your import CSV which makes it really easy to keep all your related, cross-sell and upsell products updated.

All documentation for install and user instructions as well as sample csv's and notes are included. Feel free to email me directly at scottbolasevich@gmail.com with any questions

Extension Features:

- Import/Export related products / up-sell and cross-sell
- Import/Export product positions for related products / up-sell and cross-sell
- Can append to existing related/cross-sell/up-sell or complete delete all or just overwrite with new relations.
- Comes with a User Manual / Install Instructions

Extension Installation

1. Log out from Magento Admin panel if you are logged in
2. Unpack the contents of the zip file purchased and VIA ftp and upload the app folder to your magento install root.
3. SSH into your magento server and Clear cache using command
4. After uncompressing the product relations import/export package, you should have one folder: app

```
php -f bin/magento cache:flush
```

Upload everything in the app/* folder to your app/* folder.

5. SSH into your magento server and run command via ssh in root of magento install to install module

```
php -f bin/magento setup:upgrade
```

and

```
php -d memory_limit=1024M -f bin/magento setup:di:compile
```

Extension Usage

1. **DO NOT** – Edit the CSV in excel it strips format and breaks import. I recommend using openoffice.org calc and saving in utf-8 format.

2. Overall the extension is very straight forward. You can find in magento admin under

system -> Import/Export Product Related/Upsell/Crosssell

and you can run the export to get a sample csv of product already in your site and then you just upload via the browse button and click the import product related/upsell/crosssell button and it will import it into the system.

3. By default the product relations extension will export related/upsell/crosssell products without positions. You can change the "[Include Positions](#)" by setting from "No" to "Yes" to include the position value as well.

4. By default the product relations extension will import related products for a product and delete all existing related products. If you want to keep existing related products and add the ones from your csv change the "[Append Related Products](#)" setting from "No" to "Yes"

5. By default the product relations extension will import cross-sell products for a product and delete all existing cross-sell products. If you want to keep existing cross-sell products and add the ones from your csv change the "[Append Cross Sell Products](#)" setting from "No" to "Yes"

6. By default the product relations extension will import upsell products for a product and delete all existing upsell products. If you want to keep existing upsell products and add the ones from your csv change the "[Append Upsell Products](#)" setting from "No" to "Yes"

7. Note the following settings and values for data in the csv

sku = this is required and is of the SKU you want to import related/up-sell/cross-sell product into.

crosssell = optional column (you can do just this or cross-sell and related or all 3 or just 1). Also position formatting is optional and can be **postion:sku** or just sku

upsell = optional column (you can do just this or cross-sell and related or all 3 or just 1). Also position formatting is optional and can be **postion:sku** or just sku

related = optional column (you can do just this or cross-sell and related or all 3 or just 1). Also position formatting is optional and can be **postion:sku** or just sku

Support

CommerceExtensions offers 1 hr of EMAIL support and updates for 1 year for all extension developed for Magento 2.

If you need support related to CommerceExtensions extension usage, feel free to contact me at scottbolasevich@gmail.com
