# CMS Stores Management

This extension adds functionality for managing CMS pages and CMS Blocks stores/websites assignments through the Grid Actions. You don't need to go through each CMS Page anymore, if you want to add new Store view. Or, if you created a new Website and want to copy content of already existed CMS pages to the new Website, you can easily do it with our new Mass Actions. The extension will add new Actions for Pages/Blocks, for Copy (Duplicate), Assign, Dissociate particular pages to/from Store views or Websites.

Admin can just go to Magento Backend -> Content -> Pages or Blocks, then select Pages/Blocks that he need from the list, select one of 3 new actions (Copy, Assign, Dissociate), select Website or Store and Confirm his action.

## Pages

For Manage CMS Pages, please go to: Magento Backend -> Content -> Pages

In Actions you will see 3 new actions:

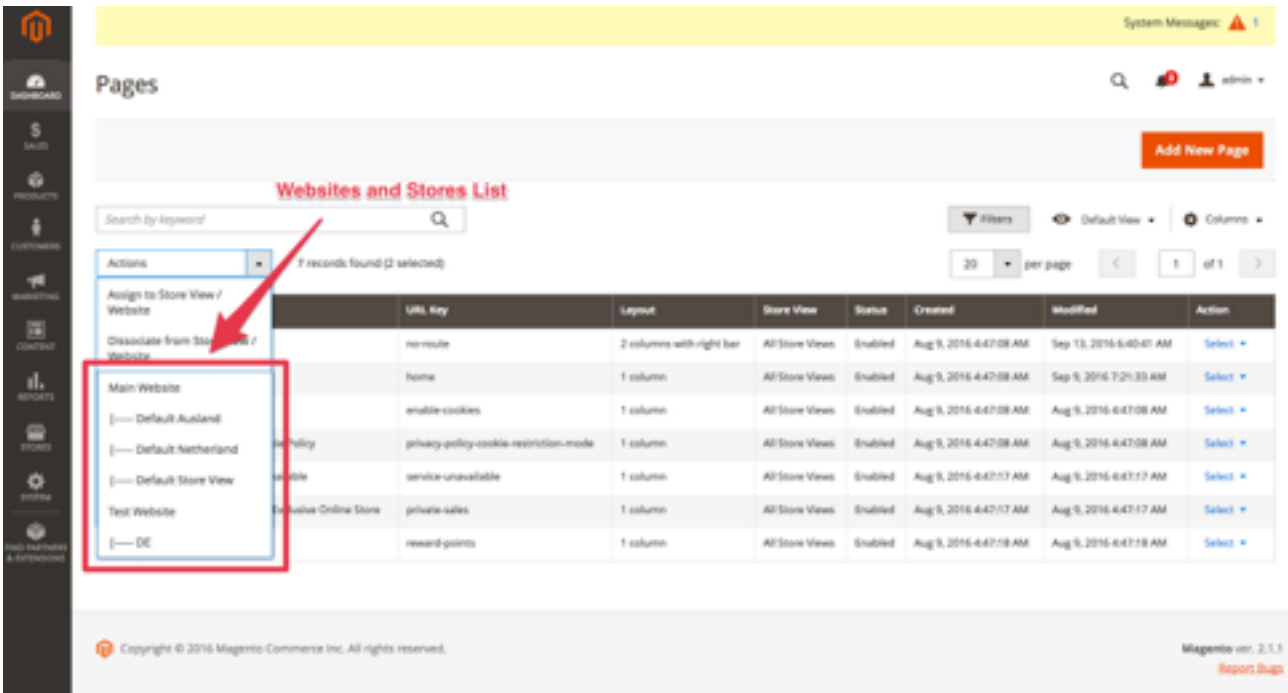

- Assign to Store View / Website - assigning selected Pages to selected Store View or Website
- Dissociate from Store View / Website - dissociating selected Pages to selected Store View or Website
- Copy to Store View / Website - copying selected Pages and their content to selected Store View or Website

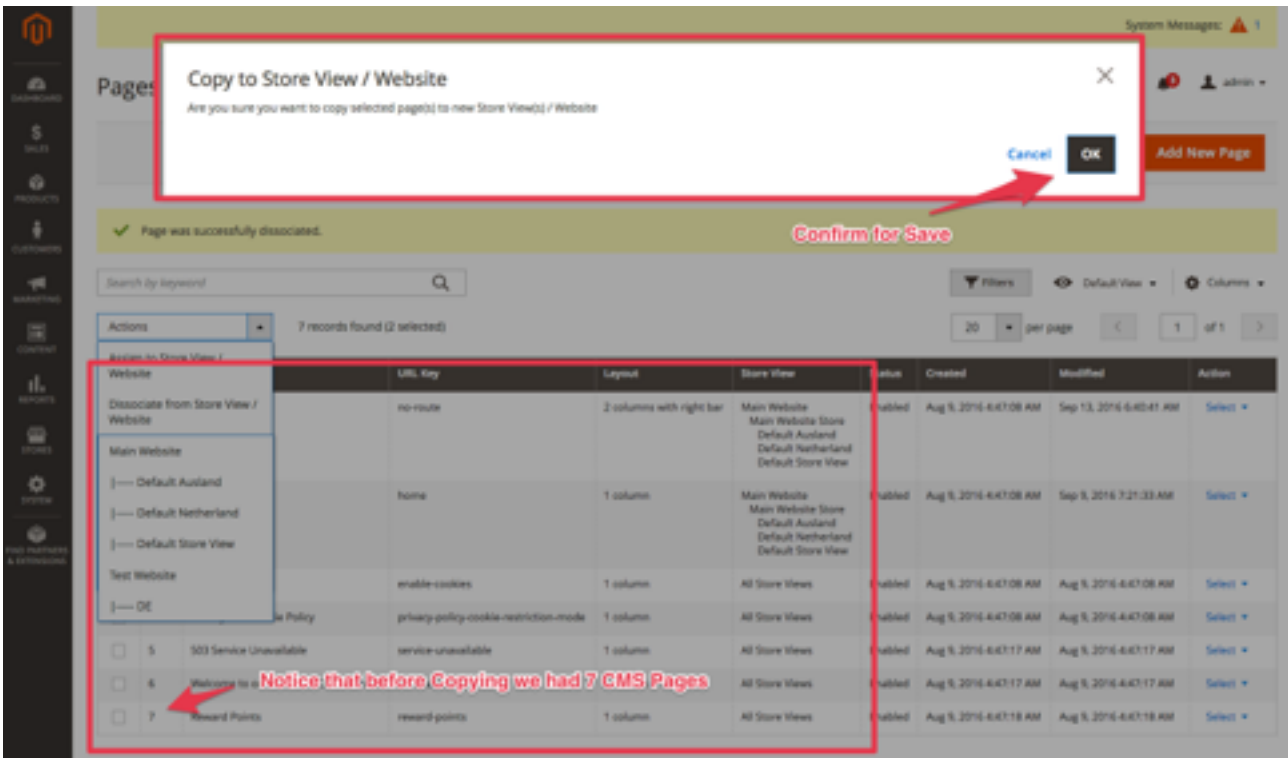

The screenshot shows the Magento CMS Pages grid interface. A red box highlights the 'Actions' dropdown menu, which contains three new actions: 'Assign to Store View / Website', 'Dissociate from Store View / Website', and 'Copy to Store View / Website'. A red arrow points to the 'You saved the page.' notification banner above the grid. The grid itself displays a list of pages with columns for URL Key, Layout, Store View, Status, Created, Modified, and Action.
