

# ConvertedIn Magento Document

## Installation :

### 1. How to Install the Magento Plugin

Step 1. Download the Zip file.

Step 2. Place the code under app/code directory.

Step 3. Run the Magento Command

Step 4. Flush the cache.

## Feature :

This module helps you to synchronise your magento store with convertedIn.

- Customer Synchronisation with ConvertedIn
- Order Synchronisation with ConvertedIn
- Category Synchronisation with ConvertedIn
- Product Synchronisation with ConvertedIn

## User Guide :

Step - 1 After Installation enable module from backend and select the convertedIn mode.

Step - 2 Create account at <https://www.converted.in/> if not created yet.

Step - 3 Enter the storeUrl Signature and AccessToken in magento Admin configuration

Step - 4 Click on the Create Store Button.. It will create Store in On the convertedIn.

After That you will be able to login directly from magento to convertedIn by clicking the Auto login to Converted Button.

The screenshot shows the Magento Admin configuration interface for the 'CONVERTED CONNECTOR' module. The page is titled 'General Configuration' and includes a 'Save Config' button in the top right corner. The left sidebar contains a navigation menu with the following items: GENERAL, CATALOG, SECURITY, CUSTOMERS, SALES, YOTPO, DOTDIGITAL, SERVICES, and ADVANCED. The main content area is divided into two sections: 'General Configuration' and 'Create Store Configuration'. In the 'General Configuration' section, the 'Enable' dropdown is set to 'Yes' and the 'Mode' dropdown is set to 'Live'. The 'Create Store Configuration' section contains three input fields: 'Store Url' (with the value 'http://ec2-34-255-1-231.eu-west-1.compute.amazonaws.c'), 'Signature', and 'Access Token'. Below these fields is a 'Create Store' button. At the bottom of the page, there is a dark button labeled 'Auto Login to Converted'.
