

Postcode Lookup & Validate for Magento 1

User Guide

Download and Installation

- **Getting the Download link from Magento Connect:**

- Visit the following link, which directs you to the Crafty Clicks Postcode Lookup extension page:
<https://www.magentocommerce.com/magento-connect/uk-postcode-lookup-address-finder-1.html>
- Select the desired platform, then click on the Install Now button.
- Accept the extension license agreement, then click on the Get Extension Key button.
- Copy the link.

- **Installation**

- Log in to your webshop's Magento Admin Panel
- Under Systems/Magento Connect click on Magento Connect Manager.
- Log in again, with your credentials.
- Now you see a section on the page, called Install New Extensions.
- Copy the extension key from Step 1 and click the Install button.
- You can see now the details of the module such as the Package Name, Version and the Status.
- If you want to proceed, click Proceed.
- After the installation is finished successfully, on the bottom of the page, in the terminal window all the text should be green.
- Click on Return to Admin on the top of the page.
- Log out of the Magento Admin Panel, then log back in.
- Locate our module under System/Configuration.
- You should see it on the left hand-side menu. The name is UK Postcode Lookup.

Configuration

- Replace the xxxxx-xxxxx-xxxxx-xxxxx with your access token.
- Change the value of Enabled Frontend from No to Yes.
- Click on Save Config.
