**BOUGHT**

For Magento 2.x

## The Extension

Cubet Also Bought is a **Customer Who Bought This Also Bought** kind of extension for Magento 2. The extension *automatically* reads the purchase history and shows the products that are bought together and shows them as a Also Bought block on corresponding product view page. The purchase history keeps updated with the purchases made on the site.

## Installation

To install the extension manually, please follow the Installation Guide available along with the extension. If you need help on installing the extension, please feel free to contact us for the installation support.

## Configuration & Setting Up

The extension is using jQuery Plugin [Slick Carousel](#) to maintain its responsiveness. Also, a html developer can easily change the responsive settings through its template file.

The configuration and setting up of the block is very easy.

## Stores > Settings > Configuration

The screenshot shows the 'Configuration' page for 'Also Bought Block Settings'. On the left is a sidebar with navigation options: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CUBET RMA, CONTENT, REPORTS, STORES, and SYSTEM. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. Below the title is a section for 'Also Bought' with a 'GENERAL' tab selected. The settings are as follows:

Setting	Value	Description
Enable AlsoBought Block [store view]	Yes	Enable/Disable the Extension
Number of Products [store view]	10	Number of Products should display in Frontend Block
Title of the Block [store view]	People Also Bought	Title of the Also Bought Block
Category Filter [store view]	Yes	Should the Products needed to filtered by Parent Product Category?
Show Only In Stock Products [store view]	Yes	Whether to exclude out of stock items from the Block

### Configuration Fields

- **Enable AlsoBought Block** - This Yes/No dropdown enable/disable the extension output, if the extension needs to disable temporarily we can turn off the block by selecting the option No. The default value is “Yes”.
- **Number of Products** - This is number of bought together products that should display in the frontend carousel. If your system is in moderate server load, it is recommended to put a minimum 2 digit value. If your server has enormous memory and faster response, you can try any number till you find the product view page loading without much time. The default value is “10”.
- **Title of the Block** - The title of the block will display as block title in the frontend. The default value is “Also Bought These”.
- **Category Filter** - This will enable a further filter to the Also Bought Block, the filter finds the categories that the parent product belongs to and filter out those product that aren't belongs to them from the Also Bought Carousel. This will bring a feel that related products, which are bought together. The default value is “No”.
- **Show Only In Stock Products** - This will stop displaying Out of Stock Products, which make sure the customers always saw the products available for sale. The default value is “No”.

## Frontend

The extension will automatically fetches the order details in order to get the products that are bought together and show them with less time. The frontend block will look like this.
