Admin Extension Logs User Guide

This extension for Magento 1 stores allows you to view the last changes made to the configuration settings in the Magento backend. Once you have installed the extension there will appear a history icon (shown below) next to each configuration setting.

On hovering over this icon, you can view the history of the changes made to the configuration settings.

The Admin can view the following details regarding the changes made to respective settings:

Previous value

Changed by (Admin User)

Changed From IP

Changed on (Date and Time)

After the installation of the extension, changes made in the Magento configuration setting can be seen by mousing over the history icon, a tooltip with details will be shown.

XML Sitemap Plus Generator & Splitter

'XML Sitemap Plus Generator & Splitter' is a product of CueBlocks. You can read more about others [here](#) . You can visit our website at - www.CueBlocks.com

What this extension does ?

XML Sitemaps Plus Generator and Splitter extension will enable you to split the XML sitemaps of your store easily (when engines like Google, Bing/Yahoo to find content on your store. The maximum limit to which Google follows an XML site if your store has more than 50,000 pages, this extension will automatically split your store's XML Sitemap into smaller site all these sub-sitemaps in it. Even if the total number of pages in your store are less than 50,000, this extension will create 'Magento controlled' pages on your store (eg. Category, product, reviews, tags, CMS pages).

Use the following settings to control the w

Previous value: No
