

# Size Chart Extension Magento 2 – User Guideline

---

The graphic features a purple background with a white circle on the left containing the title 'Size Chart Extension'. To the right of the title is a list of seven features, each preceded by a checkmark. Further right is an image of a white t-shirt with a globe logo, with dimension lines indicating its size. At the bottom right is the Magento 2 logo.

## Introduction

Customers are always hesitant when selecting online clothing and all wearable products. If a customer purchases an item which does not fit in size, they will not be happy. This could result in the customer returning the item after the purchase and then, they may not trust your store to purchase any products.

Size Chart for Magento 2 by CynoInfotech helps customers easily find out the actual size of apparel, shoes, accessories, and more. This extension allows the store admin to create a unique size chart for each product. The admin can easily add new chart sizes by using the visual HTML editor, set chart size images, and set block and inserts variables. Now, customers can easily find out the correct size of outfits and enjoy to purchase.

Size Chart helps to display size chart in popups, on product pages, and product tabs. The customer will just click on the button, and it will show the size chart in a popup. Size Chart also helps your customer to purchase quicker, easier and with satisfaction. This extension also helps to increase the store's reliability and revenue.
