

Dapl Advanced Filter Extension for Magento - User Guide

Introduction

The Advanced Filter Module for Magento 2 helps you select the relevant filters and deselect or hide the ones that are not required at all. Suppose your e-commerce website sells clothing as well as accessories including makeup products. Now, when you're on the clothing page, you may want to show filters such as size, price, and color. And when you are on the makeup page, you may want to show filters such as price and size and exclude the color option. This works fine when you're on the page of an individual category.

Feature Highlights

Enable/Disable from admin

Admin will have all the freedom to use this module to its full potential. This allows you to enable or disable it from the admin panel. This means, you can use it for your current Magento 2 store, and if you don't require it for your store, you can disable it from the admin panel and use it for later.

Hide filters from specific categories

If you don't want to use any specific filter under a specific category, you can do that with ease using Advanced Filter Module. You'll get the option to hide filters, where you'll have to select the ones you want to hide. And it's done!

Select multiple filters to hide

With this module, you can hide not one but multiple filters at a time

Select 'None' option to not hide any filters

There is also the "None" option in this module, enabling you not to hide any filters.

Step by Step Guide

1. In the 'Stores' menu, click on the arrow on the 'Configuration' button to see Configuration.

Configuration

The screenshot shows the 'Advanced Filter Configuration' page. On the left, there's a sidebar with categories: GENERAL, CATALOG, CUSTOMERS, SALES, SERVICES, and ADVANCED. The 'CATALOG' section is expanded. At the top right are 'Save Config' and user status icons. The main area has 'Extension Information' with the module name 'DIGITAL' and version '0.0.1'. It also shows the 'Advanced Filter' configuration with an 'Enable [store view]' dropdown set to 'Yes'. Red annotations highlight the 'Advanced Filter' button in the sidebar, the module name/version, and the enable/disable option.

2. Goto Categories under Catalog menu and edit any category:

Jackets (ID: 14)

The screenshot shows the 'Edit Category' page for 'Jackets' (ID 14). It includes fields for 'Category Name' (set to 'Jackets'), 'Enable Category' (set to 'Yes'), and 'Include in Menu' (set to 'Yes'). A sidebar lists categories like 'Default Category (2047)', 'What's New (0)', 'Women (0)', 'Men (0)', 'Tops (678)', 'Bottoms (304)', 'Gear (46)', 'Collections (13)', 'Training (6)', 'Promotions (0)', and 'Sale (0)'. A dropdown menu for 'Hide Filters' is open, showing options like 'None', 'Price', 'Manufacturer', 'Color', 'Activity', and 'Style Bags'. Red annotations point to the 'None' option in the filter dropdown and the 'None is selected for Jackets category' message.

3. Now you can select attributes which you want to hide for specific category and Save. Flush the Magento Cache:

Jackets (ID: 14)
