Introduction to Mega Search

Mega Search module provides auto search suggestions in an efficient manner. It provides search results which includes Products, Categories and CMS Pages. The Mega Search module also supports keyword navigation in the search suggestions.

Version & Compatibility Support

Version:

1.0.0 Stable

Compatibility:

This extension is compatible from Magento Community 2.x and Magento Enterprise 2.x to the latest versions.

Features

- Effective product & non-product searches
- Auto suggests relevant products, categories & CMS Pages
- Supports key navigations to select / navigate through results
- Enlarged suggestions box
- Search keyword will be highlighted in search suggestions
- Most of the options are manageable from the back-end
- Product Information like name, image, short description, and rating will be listed in the suggestions
- Shown tabs in search results page with products, categories and CMS pages with respective counts

How to Install Mega Search?

Step 1: Download/purchase the extension.

Step2: Create a directory `app\code\DCKAP\MegaSearch` in your Magento Installation directory.

Step 3: Unzip the file in the above directory.

Step 4: Enter the following at the command line:

```
php bin/magento module:enable DCKAP_MegaSearch
```

Step 5: Enter the following at the command line:

```
php bin/magento setup:upgrade
```

Step 6: Login to Magento backend and navigate to Store -> Configuration -> DCKAP->Mega Search and configure the module.

Step 7: Clear the cache using the following command:

```
php bin/magento cache:clean
```

General Configuration

General Options

Enabled <small>[store view]</small>	<input type="text" value="Yes"/>	▼
Minimum Characters <small>[store view]</small>	<input type="text" value="1"/>	

Specify minimum number of characters to provide search suggestions.

- Select Enabled to Yes for enabling the module.
- Specify Minimum Characters for checking search suggestions only when minimum number of characters entered.

Suggestions Limit Configuration

Suggestions Limit ⌵

Provide appropriate numbers to limit search suggestions.

Products
[store view]

Categories
[store view]

Pages
[store view]

This configuration provides module to list specified number of search suggestions such as products, categories & CMS pages even if the results are more. A more link is provided with the suggestions to navigate to see all search results.

Categories Configuration

Categories ⌵

Category Level
[store view]

This avoids top level categories in Search Suggestions. For Ex: In order to avoid displaying Default Category, provide 2.

This configuration avoids top level categories to be listed in search suggestions. This is intended to store owners for not displaying root categories in the suggestions.

Page Configuration

- Specify Description Length in Search Suggestions to a valid number which limits the description length of CMS Pages in Search Suggestions.
- Specify Description Length in Search Results Page to a valid number which limits the description length of CMS Pages in Search Results Page.
- Specify Exclude Pages with CMS Page IDs as comma separated to not be listed in Search Suggestions / Search Results Page.
- Specify Pagination Allowed Values for pagination values in CMS Pages Tab of Search Results Page.
- Provide Pagination Default Value to a specific number as a default value. Must be in the allowed values list.

Pages

Description Length in Search Suggestions <small>[store view]</small>	<input type="text" value="100"/>
Description Length in Search Results Page <small>[store view]</small>	<input type="text" value="200"/>
Exclude Pages <small>[store view]</small>	<input type="text" value="1, 2"/> <p>Provide CMS page id's as comma separated to exclude the pages in search results. Comma-Separated.</p>
Pagination Allowed Values <small>[store view]</small>	<input type="text" value="5, 10, 15, 20"/> <p>Comma-Separated.</p>
Pagination Default Value <small>[store view]</small>	<input type="text" value="5"/> <p>Must be in the allowed values list</p>

Search Suggestions

Mega Search suggestions provide search results including Products, Categories & CMS Page results. Categories results include the hierarchy path which also helps to find the respective category. More Link / Title will navigate to the search results page of respective block.
