## Introduction to Quick Order

---

In this fast moving eCommerce world, everyone wants to do their work more quickly. When ordering products regular customers would prefer a quicker option without having to navigate and search in various categories. Quick Order is one such extension which provides the customer an easy checkout user experience.

Quick Order extension enables

- Customers to add multiple products with specific quantity at once.
- Search a specific product by SKU/Name and it will auto-suggest the items based on the search keyword.
- The customers to either search the items or simply enter the known part number and add all those items to cart.

## Version & Compatibility Support

---

### **Version:**

1.0.0 Stable

### **Compatibility:**

This extension is compatible with Magento Community 2.x and Magento Enterprise 2.x versions.

## How to Install Quick Order?

---

**Step 1:** Download/purchase the extension.

**Step 2:** Create a directory `app/code/DCKAP/Quickorder` in your Magento Installation directory.

**Step 3:** Unzip the file in the above directory.

**Step 4:** Disable the cache under System >> Cache Management

**Step 5:** Enter the following at the command line:

```
php bin/magento setup:upgrade
```

**Step 6:** Login to Magento backend and navigate to STORES >>Quick Order->Settings and configure the module.

## Module Configuration

To configure the extension, navigate to STORES > Quick order > Settings from the left side menu in the backend. Set 'Enabled' field to 'yes' and also set some desired values for other fields too.

Field	Value	View
Enabled	Yes	[STORE VIEW]
Default No. of rows to display	4	[STORE VIEW]
SKU-Quantity Separator	#	[STORE VIEW]
Autocomplete minimum character length	3	[STORE VIEW]

Here is the description for the each configuration options from the above screen,

- 1. Enabled:** Set 'Yes' to enable the extensions. Set 'No' to disable the extension.
- 2. Default No.of rows to display:** Enter only numeric values. For example 4, it will show 4 rows as default when you click the quick order button in the front end.

×

Name / Product Code	SKU	Qty	Price	Action
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>

**4 ROWS**

OR

Enter the list of product SKU's with quantity...

**Format:** SKU#quantity  
**Example:** SKU1#5,SKU2#10

×

Name / Product Code	SKU	Qty	Price	Action
yog <b>Auto populate the search result after 3rd charter entered</b>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
Voyage Yoga Bag 24-WB01		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
Sprite Foam Yoga Brick 24-WG084		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
Zeppelin Yoga Pant MP08		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>

OR

Format: SKU#quantity  
Example: SKU1#5,SKU2#10

## Features

---

Quick Order extension comprises of several essential features enhancing the online shopping experience of both B2C and B2B customers. Listed below are some of the key features...

- Supports both simple and configurable products.
- Products can be easily and quickly added to cart pop-up which runs in Ajax platform.
- Multiple products can be easily added using the autocomplete and dynamic rows in the popup.
- Simple products can be added quickly to cart, by specifying the SKU and the Quantity in the text area.
- Admin has an option to modify the number of product rows to be displayed.
- Admin can change the number of characters required for product Autosuggest result listing.

## How to orders products quickly?

---

After installing the extension and clearing all the caches, we can see a quick order button at top right corner. Users can click on the button and order the products using the Quick Order pop up.

They can add simple and configurable products to cart using this popup.

For configurable products, they must select the product first and then the options will appear. After that they can select the desired configurable attributes and add the product to the list.

Name / Product Code	SKU	Qty	Price	Action
<input type="text" value="mon"/>		<input type="text"/>		<button>Add to Cart</button> <button>Clear</button>
Harmony Lumaflex™ Strength Band Kit 24-UG03		<input type="text"/>		<button>Add to Cart</button> <button>Clear</button>
Beaumont Summit Kit MJ01		<input type="text"/>		<button>Add to Cart</button> <button>Clear</button>
Montana Wind Jacket MJ03		<input type="text"/>		<button>Add to Cart</button> <button>Clear</button>
		<button>Cart</button>	<button>Checkout</button>	<button>+ Add all to Cart</button>

OR

**Format:** SKU##quantity  
**Example:** SKU1##5,SKU2##10

+ Add all to Cart Clear

## How to order products using SKU?

Customers can add the products to the cart by specifying the list of product SKU's with the quantity, in a text area in the popup.

Products and Quantity separated by '#'. This can be configured in Backend. We can also add multiple SKUs separated by commas.

×

Name / Product Code	SKU	Qty	Price	Action
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>
<input type="text"/>		<input type="text"/>		<input type="button" value="Add to Cart"/> <input type="button" value="Clear"/>

OR

24-MB02#5,24-UG03#10

**Add Multiple SKU with comma(,) separated.  
Product and quantity separated by #.  
Click 'Add all to Cart'.**

Format: SKU#quantity  
Example: SKU1#5,SKU2#10

Note: It supports only Simple, Configurable and Bundled Products.
