

# POST & DHL SHIPPING FOR MAGENTO 2

The *Post & DHL Shipping* extension for Magento 2 enables merchants to use different shipping services for order fulfillment:

- Book shipment labels with DHL Parcel Germany
- Book return shipment labels with DHL Parcel Germany
- Book stamps with Deutsche Post Internetmarke
- Auto-complete addresses with Deutsche Post Direkt Datafactory AUTOCOMPLETE
- Validate shipping addresses with Deutsche Post Direkt ADDRESSFACTORY

## INSTALLATION

The *Post & DHL Shipping* extension for Magento 2 consists of multiple Composer packages. As an integrator, you acquire the [Composer metapackage `dh1/shipping-m2`](#) from the [Magento Marketplace](#) which defines the composition of required packages. Proceed with the [installation via Magento Extension Manager](#) or follow the [command line installation procedure](#).

The Deutsche Post modules are included with the metapackage for convenience. If you do not plan to use them, it is advised to uninstall them from your project.

## USAGE

The functionality of the *Post & DHL Shipping* extension for Magento 2 is provided through multiple Composer packages.

Individual shipping services are documented on their respective Wiki pages on GitHub:

- [DHL Paket](#), [DHL Paket Returns](#), [Deutsche Post Internetmarke](#)
- [Deutsche Post Direkt ADDRESSFACTORY](#)
- [Deutsche Post Direkt Datafactory AUTOCOMPLETE](#)

The version numbers displayed in the module configuration belong to the individual composer packages and are not the same as the metapackage version number displayed on the Magento Marketplace.

## SYSTEM REQUIREMENTS AND UNINSTALLATION

You can find detailed system requirements and uninstallation instructions in the README files of the packages:

- [DHL Parcel Germany](#)
- [DHL Parcel Germany Returns](#)
- [Deutsche Post Direkt ADDRESSFACTORY](#)

- Deutsche Post Direkt Datafactory AUTOCOMPLETE

To remove the DHL Shipping metapackage from your system after uninstallation of the individual packages, run the following command from your Magento 2 root directory:

```
composer remove dhl/shipping-m2
```

## TECHNICAL SUPPORT
