## Step 6. Flush the Magento Cache

1. Click System, and then click Cache Management. The Cache Management page appears.
2. Click the Flush Magento Cache button.

The screenshot shows the Magento Cache Management page. At the top right, there are buttons for "Flush Cache Storage" and "Flush Magento Cache". Below these buttons, there is a table with 55 records found. The table has the following columns: Cache Type, Description, Tags, and Status.

Cache Type	Description	Tags	Status
<input type="checkbox"/> Configuration	Various XML configurations that were collected across modules and merged	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML	BLOCK_HTML	ENABLED
<input type="checkbox"/> Collections Data	Collection data files	COLLECTION_DATA	ENABLED
<input type="checkbox"/> Reflection Data	API interfaces reflection data	REFLECTION	ENABLED

### Flush Magento Cache

## **Storefront**

The Magento Connector works with a standard out-of-the-box storefront. The payment method and tax information provided by Digital River appear on the Order Summary. You can track the order through Magento or Global Commerce. When the invoice is completed, it sends a trigger to Global Commerce to complete the fulfillment.
