

## D7SMS Extension for Magento 2

### Summary:

- D7 SMS integration creates an efficient communication channel with your customers.
- This integration helps to easily reach your customers via SMS from within your account.
- SMS is the most effective form of communication, with a 98 percent open and read rate.

### Installation:

#### 1. Using composer

- Create a folder anywhere on your server and Extract the archive into this folder.
- Add the folder as a repository in composer. For this, run the Composer command:

```
composer config repositories.direct7/sms-m2 path PATH_TO_EXTENSION
```

```
example: composer config repositories.direct7networks/sms-m2 path  
/opt/magento/Direct7_D7SMS
```

- Perform following commands to complete installation:

```
composer require direct7networks/sms-m2  
bin/magento module:enable Direct7_SMS --clear-static-content  
bin/magento setup:upgrade
```

#### 2. Method 2 :

- Extract the package and upload to app/code/ directory. (You may create the directory if it doesn't exist)
- Go to command line, navigate to site root directory and run the following command to install the extension.

```
php bin/magento setup:upgrade
```

## Configuration - Settings:

- Navigate to Stores >> Configuration >> SMS >> SMS Settings
- Choose "Yes" for Enable option and update API credentials, Sender ID.
- (If you haven't purchased separate sender id, you can use SMSInfo)

The screenshot shows the 'Configuration' page with a sidebar on the left containing icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, SMS, Reports, and Stores. The 'Stores' icon is circled in red. The main content area is titled 'Configuration' and shows 'Store View: Default Config'. The 'SMS' section is expanded to show 'SMS settings' and 'General Configuration'. The 'General Configuration' section includes the following fields:

- Enable** [store view]: A dropdown menu set to 'Yes'.
- Direct7 API username** [store view]: A text input field with a placeholder.
- Direct7 API password** [store view]: A text input field with a placeholder.
- Sender ID** [store view]: A dropdown menu set to 'SMSInfo'.

Below the 'Sender ID' dropdown, there is a note: 'This will appear as SMS sender'.

## Configuration - Templates:

- Navigate to SMS >> Templates >> Add new template
- Update name, content and choose corresponding trigger.
- Select Phone number type and save.
- For creating contents of SMS you can use different global variables like customer.firstName, customer.lastName, customer.name, customer.email, billing.telephone, shipping.postcode, billing.street, shipping.region, order.incrementId, order.status
