

USER GUIDE

Quick Links:

This User Guide is divided into the following sections:

1. [Installation](#)
2. [Set up in Magento](#)
3. [How to use](#)
4. [Support & Customer Service](#)

1. INSTALLATION

Where you can find our modules:

1. [Magento Marketplace](#)

2. [Our Site](#)

2.

SET UP IN MAGENTO

After the install you need to log into the Magento Admin to enable the module. You'll find the Doppler logo there.

Once you click in Configuration, you'll need to pick **Email & Marketing Automation**.

To set up the plugin you need to complete this required information:

- Username (this is your Doppler Email)
- API Key

You'll see the option to Test your integration. Make sure you **Enable** the integration in the same menu to advance.

To learn more, [read this article](#).

3.

HOW TO USE

When you integrate **Doppler - Email, Automation & Data Marketing & Magento**, you can send your Buyer's information to your Doppler account automatically.

You will be able to create Lists, import your products into customizable Email Templates and design Abandoned Cart and Visited Product Automations.

In order to perform these actions, you have to complete:

- Fields mapping
- Lists syncing

To learn more, [read this article](#).

4.

SUPPORT & CUSTOMER SERVICE

For any doubts during the installation process or if you have trouble syncing your accounts, just write us:
