

Registration Notification To Admin For Magento 1x

Registration Notification To Admin

By default Magento doesn't notify you about the new registration of customer in your store. This module notifies to the admin by an email on every new customer registration. Once a customer registered in your Magento Shop, you will receive an email including all the necessary information with customer name and email-id etc. Registration Notification To Admin extension for Magento will help you to stay informed about new registration of customer in your store and will save your time and effort. Admin have the rights to disable or enable this extension through Magento Backend. It is easy to use and no need to acquire any technical skills.
