

Step 1: Download/purchase the extension

Step 2: Unzip the file in a temporary directory

Step 3: Upload it to your Magento installation root directory(app/code/)

Step 4: Disable the cache under System >> Cache Management

Step 5: Enter the following at the command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento cache:flush
```

```
chmod -Rf 0777 var pub app/etc
```
