## Installation Guide

This guide is for installing Sage Pay Suite integration for Magento2 which you can purchase [here](#).

## Installation Instructions

### Manual Installation:

1. Create folder **app/code/Ebizmarts/SagePaySuite** if not present.
2. Copy package content you downloaded from our store inside this newly created folder.
3. Run from command line: `bin/magento setup:upgrade`

You should now be able to configure the module in the following location: STORES / Configuration / SALES / Payment Methods / Sage Pay Suite
