

eComPlugins Extension Installation Guide

R & L Shipping Carrier

Shipping by Zip Code Extension for Magento® 2.x

Description:

This module will calculate RL carrier shipping rates. Shipping rates will be displayed at checkout and shopping cart page. Rates will be based on merchant warehouse and customer destination address. You should check all screenshots to understanding the flow of module.

Admin Features:

- You can show multiple shipping methods or can show single lowest rate method.
- You can enable and disable liftgate service, notify delivery and residential options.
- You can add extra price in shipping cost based on order total.
- You can show custom error message to customer if echo shipping not able to calculate shipping rates.

Configurations:

To use this module, Seller has to signup <http://www.rlcarriers.com/newuser.asp> and gets username and password to fetch rates from API. These keys you have to update in shipping module setting in admin panel.
