

# GNU GENERAL PUBLIC LICENSE

Version 1, March 2016

## Installation:

1. Download folder and copy all files to root folder.
2. Login to admin panel and clear cache - System -> Cache Management.
3. Go to System -> Configuration -> Shipping Modules -> Gblal Tranz carrier
4. Enter your account detail and enable it.
5. Module is enabled to calculate shipping prices on frontend
6. Update shipping setting for the store. Check screenshot for more details.

**Note: For shipping tab module, you need to create a attribute name as "shipping\_class". Otherwise it will not work.**

1. Go to Admin -> Attributes -> Manage Attributes -> create new attributes name as shipping\_class, shipping\_address and shipping\_nmfc.
2. You need to enter all warehouse addresses in shipping\_address. It will be dropdown type.
2. Go to Admin -> attribute -> Manage Attributes -> Manage attribute set and add to default set.
3. You can check screenshots how it will work
