

MailCamp

Introduction

MailCamp extension is unique in the market. It is the only email service provider (ESP) in the Netherlands that can be purchased as an email marketing software.

The extension has the following features:

- Contacts Management
- Marketing Automation
- Extensive statistics
- API
- Responsive Editor
- Landing pages

Compatibility

- This extension is compatible with Magento version 2.3.x and 2.4.x

Installation

1. Download the extension package from the account and extract the downloaded archive.
2. Copy the "app" folder (and its content): "/" to the root Magento directory.
3. Positioned in the root Magento directory execute the following commands:
 - Install: `php bin/magento setup:upgrade`
 - Recompile: `php bin/magento setup:di:compile`
 - Clear the Magento cache (Optional): `php bin/magento cache:clean`
