

Easy Product Labels

Version: 1.0.0

Overview

Easy Product Labels extension enables store owners to assign eye-catching product labels to desired store products. It allows merchants to select the product label type, product label position and product label text from the store back-end. Store owners can display different product labels on required store products such as horizontal ribbon label, vertical ribbon label and angled ribbon, etc. It also enables store owners to choose the different position for selected product label such as top-right view, top-left view, bottom-right view, etc. Moreover, the store owners can also select the product labels based on the text present on them such as “Featured”, “Hot”, “Bestsellers” and “Latest”. These eye-catching labels will immediately draw customers’ attention to store products.

Easy Product Labels extension also provides store owners an opportunity to run different promotional campaigns for their store products. Store owners can use this opportunity to attract more visitors to their store products. Hence, the extension helps merchants to generate more leads and conversions.

The Purpose

The team of Easy Product Labels is focused on delivering conversion boosting solutions to store owners. Using this extension, the store owners can attract more customers to their desired store products and boost their store conversion rate.

Installation Steps

First of all, you need FTP/SSH access and then follow these steps to complete the

Unpack the Downloaded (ZIP) Package File

Step 1

Upload Eecom folder to the **app/code** folder of Magento® 2 Installation.
