## Overview

---

Responsive Nivoslider add a showcase of attractive banners on your store to advertise your products, offers, sales, promos, etc. This plugin features many of unique transition effects, an image preloader, autoplay that stops on user interaction and lots of easy to set options to create your own effects. Responsive feature of this slider makes sure that it's resolution remains same irrespective of screen size and different devices. You can set different navigation styles like bullets, arrows, tabs & thumbnails with responsive slider.

It provides optimized performance and make sure that slides, loads lightning fast on every resolution device. Its intelligent lazy loading, Loads original files and scale those automatically according to requirement. There is no limit to add slides or images in the slider, you can add as many as you want to show on your website.

## Why Nivoslider?

---

- Fully responsive and works great on every device (Desktop, Tablet, Mobile)
- Lots of ready to use styles included
- Monitor and optimize all aspects of your sliders

## Features

---

- 1. Multi store configuration with single installation:** Extension works fine with multiple store. Now days many Magento sites are configured for multiple stores with a single installation and slider facilitate to configure it for each and every store separately.
- 2. Performance Optimization:** It optimizes all aspects of slider and load images intelligently to provide smooth loading experience. Lazy loading makes it more fancy and preferable.
- 3. Fully Responsive Solution:** Nivoslider works great on different resolution devices. It loads core images and scale automatically according to the screen resolution.
- 4. Custom transitions/animations:** Extension has also facilitated with many different transitions and animation options for slider to make it more attractive and intuitive to use on different platform.

## Configuration

---

Extension configuration is required to make it ready to function and set-up according to your requirements. Here is step by step guide to configure it.

System > Configuration > Extension Hut > Responsive Nivoslider

### General Settings

- Effect:** Extension provides a different effect for slide transition which shows slide images with an attractive ways like fold, fade, sliceDown, sliceUp, Box, etc.
- Slices:** This option works with slice animation effect. Here you can set a number to slice the image into parts of same.

Effect	fade	[STORE VIEW]
Slices	15	[STORE VIEW]
Box Cols	100	[STORE VIEW]
Box Rows	100	[STORE VIEW]

- Box Cols:** This option works with Box animation where you can set the number of box columns for animation.
- Box Rows:** Box rows help to set number of box rows for animation.
- Animation Speed:** Transition speed for the slides can be adjusted from admin panel which is added in milliseconds.

Animation Speed	3000	[STORE VIEW]
Pause Time	3000	[STORE VIEW]
Start Slide	1	[STORE VIEW]

- Pause Time:** Here you can set the pause time between each slide transition.
- Start Slide:** This allows to set first slide of the slider to start with.
- Direction Nav:** Next and Previous navigation buttons can be shown and hide from the slider just by selecting yes and no respectively.

Direction Nav	No	[STORE VIEW]
Control Nav	Yes	[STORE VIEW]
Control Nav Thumbs	No	[STORE VIEW]

- Control Nav:** Control navigation allows to add paginations on slider for each slide or image.
- Control Nav Thumb:** Extension also gives you the option to display images thumb for each slide in slide as pagination.

**11. Pause On Hover:** This option allows to stop the animation while hovering mouse on the slides.

Pause on Hover	<input type="text" value="No"/>	[STORE VIEW]
Manual Advance	<input type="text" value="No"/>	[STORE VIEW]
Previous Text	<input type="text" value="Prev"/>	[STORE VIEW]
Next Text	<input type="text" value="Next"/>	[STORE VIEW]
Random Start	<input type="text" value="No"/>	[STORE VIEW]

**12. Manual Advance:** This option force manual transition which allows to customize the default transition or add new ones.

**13. Previous Text:** This helps to add text for previous navigation button.

**14. Next Text:** This helps to add text for next navigation button.

**15. Random Start:** To start slider from random slides this option can set to yes. If this set to no then animation will always start with the first slide.

ExtensionHut > Nivoslider > Manage Slide

This section provide list of all added slides with different options to add/edit and manage these slides.

**Manage Slides** + Add New Slide

Page 1 of 1 pages | View 20 per page | Total 3 records found Reset Filter Search

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected Actions Submit

ID	Name	Effect	Title	Image	Position	Action	Status
Any	From: <input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>		
	To: <input type="text"/>						
<input type="checkbox"/>	9 Slide 1	Default	Nivo Slide 1		1	<a href="#">Edit</a>	Enabled
<input type="checkbox"/>	10 Slide 2	Default	Nivo Slide 2		2	<a href="#">Edit</a>	Enabled
<input type="checkbox"/>	11 Slide 3	Default	Nivo Slide 3		3	<a href="#">Edit</a>	Enabled

## Add New Slide

**Name:** A name for each slide can be given to its unique identification.

**Image:** Option to upload the slide image.

**Link:** A URL or link for each slide can be assigned which redirect users over required pages.

Slide Information	
Name *	<input type="text"/>
Image	<input type="button" value="Browse..."/> No file selected.
Link	<input type="text"/>
Effect	Default <input type="button" value="v"/>
Title	<input type="text"/>
Position *	<input type="text"/>
Status	Enabled <input type="button" value="v"/>

**Effect:** Each slide would have its own effect animation setting and this allows to display different slide with different transition effects.

**Title:** Text lines can also be added to show along with slides in slider.

**Position:** This option allows to set each slide position inside the slider.

**Status:** Each slide can also be enabled/disabled individually.
