Countdown Timer User Guide

Before you install this module, you should make a backup of your site. The instance mode should be set to development before you begin the installation. Enter the console and navigate to run the command below.

1. php bin/magento deploy:mode:set developer then goto /app/code folder. (If you don't see the code folder, you need to create one. After that create an Elfsight/CountdownTimer folder and extract the extension files into this folder. If there are any files already in the Elfsight/CountdownTimer folder, remove them and replace with the new extracted ones).

2. Next, open the console and navigate to run the command: php bin/magento setup:upgrade Important: If you're installing the module in developer mode, you don't need to re-compile. If not, recompile and generate the browser static-content with the command below:

1. php bin/magento setup:di:compile

2. php bin/magento setup:static-content:deploy

Switch the mode back to production after you complete the setup. magento deploy:mode:set production & make sure all file and folder permissions are correct.

Backend settings:

PHP: 7.0

MySQL:
5.7

Options:

Name	Value	Description
Type	scheduled	Select timer type you need to use. Start-to-finish timer counts the time from

		the start time to end time. Remaining time counter counts down the time interval you indicate and it's unique for each website visitor. Start-to-finish number counter counts the number from the start number to end number.
Start Time	-	Set the start date and time for the timer. The timer will be displayed on your website only after the start time.
End Time	-	Set the finish date and time.
Count from	1	Starting number for the timer. If this value is more than the end number, the numbers will be counted down. If this value is less than the end number, the numbers will be counted up.
Count to	100	End number for the timer. If this value is more than the start number, the numbers will be counted up. If this value is less than the start number, the numbers will be counted down.
Countdown Frequency	auto	Set the frequency with which the numbers change in your counter. If you set to auto, the widget will use our smart algorithm that emulates real human behavior and encourages people to act.
Custom Countdown Frequency (sec)	10	Set the countdown frequency rate in seconds.
Remaining time period	24	Set the remaining time period in this field, and choose the relevant time unit in the next field. For example, 24 and hours.
Set the time in	hours	Set the time unit to be applied to the value in the field above.
Position	custom	Position your timer. Choosing install to required position will make the timer display exactly where you've added your widget. Static top bar - the timer is displayed as bar only on top of the page. Floating top and bottom bars

		display the timer at top/bottom of the your browser window and they are visible while scrolling the page.
Message Before Timer	Limited-time offer! Sale ends in	Set any text you want to display before the timer. Describe your offer or encourage your visitors to take action.
Display the count in	"days" "hours" "minutes "seconds"	Choose how to display your count.
Days label	Days	Set your own days label or leave it blank.
Hours label	Hours	Set your own hours label or leave it blank.
Minutes label	Minutes	Set your own minutes label or leave it blank.
Seconds label	Seconds	Set your own seconds label or leave it blank.
Select action	hide	Select an action to perform upon timer finish.
Message after the timer finish	-	Set the message to display after the count is over. For example, direct the visitors who had missed your offer to your sales page.
Timer Align	center	Align your widget to the left or right side of the container, or place it in the center of it.
Button Link	-	Set the URL to direct your visitors to. This button will be displayed only if you set the link.
Button Text	Shop now	Set button text to encourage your visitors to take action.
Open the link in a new browser tab	true	Set this option to ON to open the link in a new tab. Set it to OFF to open in the same window.

Make the whole timer clickable	true	Set this option to ON to make the entire timer area clickable. Set it to OFF to have only one clickable button in the timer area
Style	separated-blocks	Choose the display style of your timer.
Holiday theme	default	Optional feature to style your widget in the spirit of the season.
Timer color	rgb(27, 88, 255)	Set your timer color.
Labels Color	rgb(0, 0, 0)	Set timer labels color.
Message color	rgb(0, 0, 0)	Set the message color.
Button color	rgb(0, 0, 0)	Set the button color.
Background Color	-	Set the background color.
Message font size (px)	20	Set the font size for the message text.
Timer Size	32	Set timer size.
Button Size	16	Set button size.
Animation	none	Choose animation type to change the numbers.
