

## Social Share Buttons Widget User Guide

Before you install this module, you should make a backup of your site. The instance mode should be set to development before you begin the installation. Enter the console and navigate to run the command below.

1. `php bin/magento deploy:mode:set developer` then goto `/app/code` folder. (If you don't see the code folder, you need to create one. After that create an Elfsight/SocialShareuttons folder and extract the extension files into this folder. If there are any files already in the Elfsight/ SocialShareuttons folder, remove them and replace with the new extracted ones).
2. Next, open the console and navigate to run the command: `php bin/magento setup:upgrade`  
Important: If you're installing the module in developer mode, you don't need to re-compile. If not, recompile and generate the browser static-content with the command below:

1. `php bin/magento setup:di:compile`

2. `php bin/magento setup:static-content:deploy`

Switch the mode back to production after you complete the setup. `magento deploy:mode:set production` & make sure all file and folder permissions are correct.

Backend settings:

PHP: 7.0

MySQL: 5.7

Options:

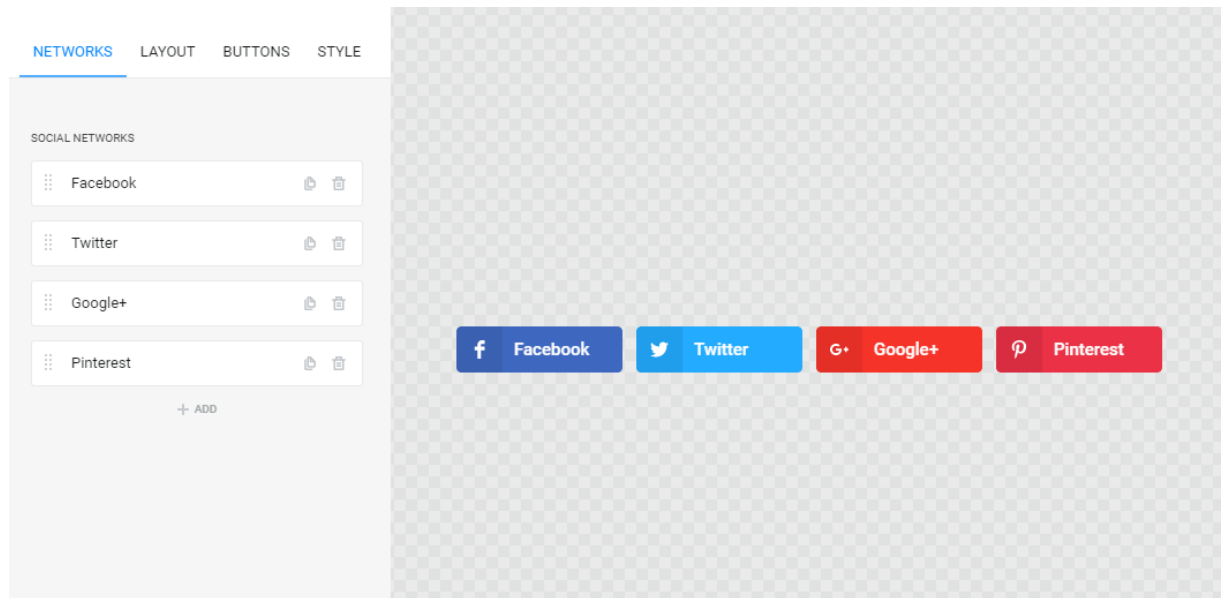

Option	Default Value	Description
Social Networks	—	Select the social network buttons you want to display on your webpage. If you can't find the network you're looking for, email us at <a href="mailto:apps@elfsight.com">apps@elfsight.com</a>
Location	—	Set the location option: choose inline or floating buttons. Inline buttons are displayed right where you placed the widget. Floating buttons are fixed in a specific position of your browser window and stay there as a user scrolls down the page.

Position	—	Align your buttons. Choose one of the three options: left, center and right.
Hide on mobile	—	Select this option to hide the buttons on mobile devices (below 768px screen width).

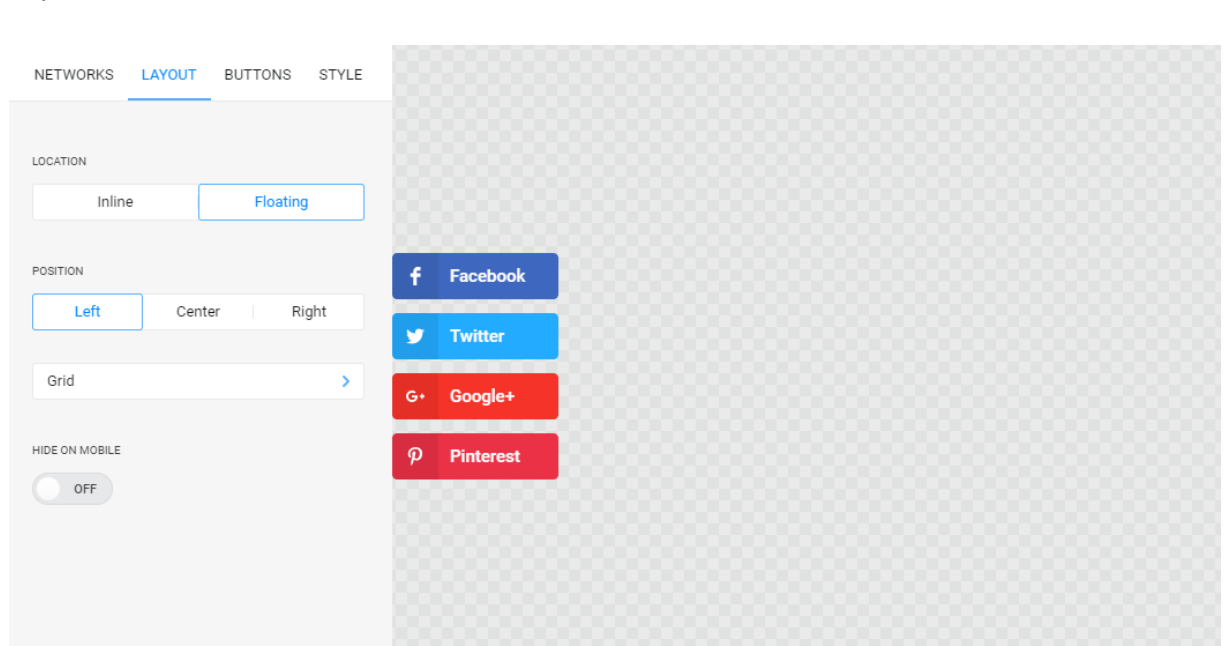

Elements	—	Check the elements to be displayed on a button.
Shape	—	Choose your buttons' shape: rectangle, rounded, circle. It defines the buttons' border radius.
Width	—	Set button width. The default width value is auto, it is calculated automatically depending on other options.
Style	—	Select the right button style from the list.
Animation	—	Choose one of the animation styles to play on hover.
