

emerchantpay Gateway Module for Magento 2 CE, EE, ECE

build **passing** stable **1.3.1** downloads **753** license **GPL**

This is a Payment Module for Magento 2, that gives you the ability to process payments through emerchantpay's Payment Gateway - Genesis.

Requirements

- Magento 2 CE, EE, ECE or higher (Tested upto **2.4.5-p1**)
- [GenesisPHP v1.21.3](#) - (Integrated in Module)

Installation (composer)

- Install **Composer** - [Composer Download Instructions](#)
- Install **emerchantpay Payment Gateway**
 - Install Payment Module

```
$ composer require emerchantpay/magento2-emp-plugin
```

- Enable Payment Module

```
$ php bin/magento module:enable EMerchantPay_Genesis --clear-
```

```
$ php bin/magento setup:upgrade
```

- Deploy Magento Static Content (**Execute If needed**)

```
$ php bin/magento setup:static-content:deploy
```

Installation (manual)

- Upload the contents of the folder (excluding `README.md`) to a new folder `<root>/app/code/EMerchantPay/Genesis/` of your Magento 2 installation
- Install GenesisGateway Client Library

```
$ composer require genesisgateway/genesis_php:1.21.3@stable
```

- Enable Payment Module

```
$ php bin/magento module:enable EMerchantPay_Genesis --clear-stat
```

```
$ php bin/magento setup:upgrade
```

- Deploy Magento Static Content (**Execute If needed**)

```
$ php bin/magento setup:static-content:deploy
```

Configuration

- Login inside the **Admin Panel** and go to `Stores` -> `Configuration` -> `Sales` -> `Payment Methods`
- If the Payment Module Panel `merchantpay` is not visible in the list of available Payment Methods, go to `System` -> `Cache Management` and clear Magento Cache by clicking on `Flush Magento Cache`
- Go back to `Payment Methods` and click the button `Configure` under the payment method `merchantpay Checkout` to expand the available settings
- Set `Enabled` to `Yes`, set the correct credentials, select your preferred transaction types and additional settings and click `Save config`
- Set `Enable e-mail notification` to `Yes` to receive emails after successful payment. **Note:** If you consider sending Order e-mail after a successful payment, make sure to enable the configuration option from the payment method config and enable the Order e-mails from the `Stores` -> `Configuration` -> `Sales` -> `Sales Emails` in the Order section.

GenesisPHP Requirements

- PHP version 5.5.9 or newer
- PHP Extensions:
 - [BCMath](#)
 - [CURL](#) (required, only if you use the curl network interface)
