

Emipro Technologies Pvt. Ltd.

Extension Installation Guide

Magento 2

Download the Latest Version

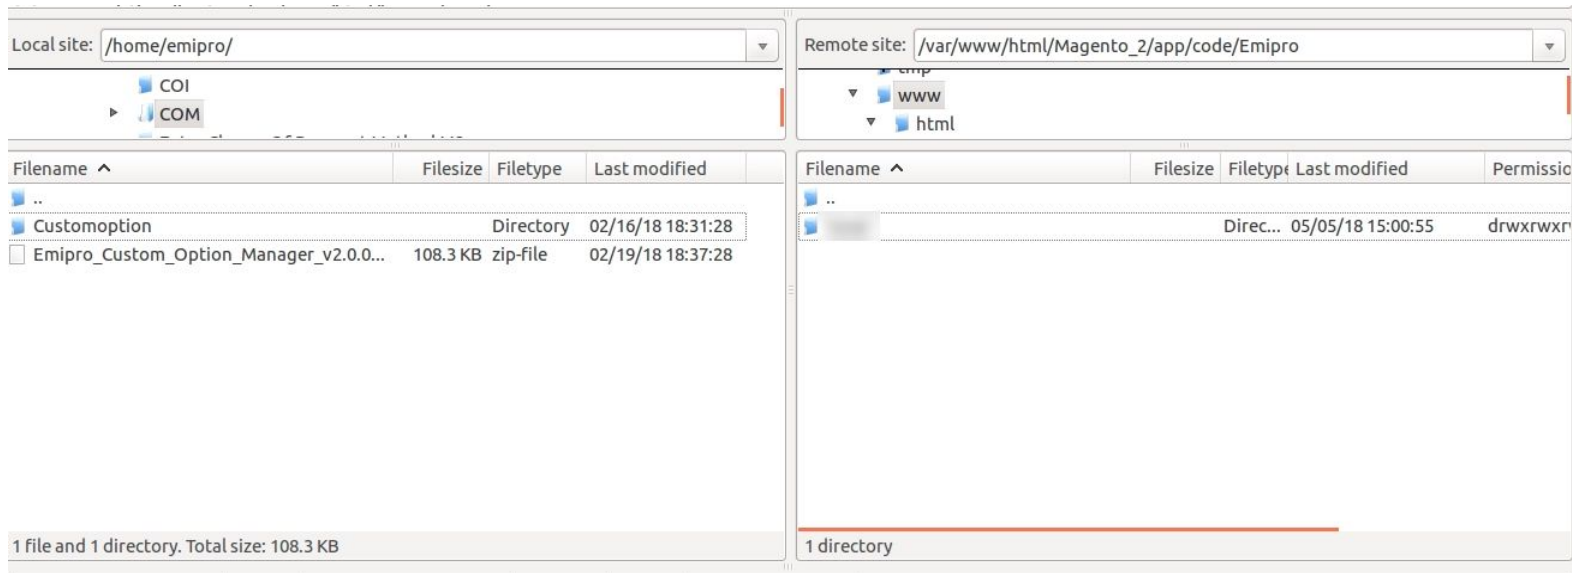

- Login into your account
- Download extension's latest version file

Pre-Installation Steps

- Backup your Magento web directory and database
- Disable the Cache
- Disable Compilation Mode

Upload Extension

- Extract downloaded zip file. It will extract a main folder.
- Go to the *'code'* folder inside *'app'* folder in your Magento installation directory and create a folder named *'Emipro'*. So now the path would be *app/code/Emipro*.
- Now, place the extracted folder inside the *'Emipro'* folder you have created. For ex., as per the below screenshot, place the *'Customoption'* folder inside the *'Emipro'* folder. So now the extension path would be *app/code/Emipro/Customoption*.

Install extension

- Upgrade your Magento: from SSH, run the command in Magento2 root directory - **"php bin/magento setup:upgrade"**
- Deployment of static content: run this command in Magento2 root directory - **"php bin/magento setup:static-content:deploy"**

Refresh the Cache

- Go to System > Cache Management
- Select all and refresh the cache

Cache Management

Flush Cache Storage

Flush Magento Cache

Refresh 13 records found (13 selected)

<input checked="" type="checkbox"/>	Translations	Translation files	TRANSLATE	ENABLED
<input checked="" type="checkbox"/>	Web Services Configuration	REST and SOAP configurations, generated WSDL file	WEBSERVICE	ENABLED

Additional Cache Management.....

Note: If you get "Page not found - 404 Error" in any menu of the extension right after the installation, you just need to log out from the admin panel and log in again to solve that problem.

Now Magento extension will work as per documentation. Enjoy it !!!

If you have any problem or question regarding your purchased Magento extension, feel free to contact us anytime.

THANK YOU

If you want customization or more functionality in our module, feel free to contact us.

We are eager to shape your system with our apps!!!
