How to install the extension in Magento 2?

To install a new extension, you will need to access your admin dashboard and navigate to **System -> Web Setup Wizard**.

From the 3 blocks of options you have at your disposal, choose the Component Manager.

Here you will see already installed extensions on your website, any new updates for them and new extensions which you can install. Click on 'Install' link below to the New Purchases label.

Magento Marketplace Account

New Updates: 0

New Purchases: 130

[Install](#)

98 records found

| Component Name | Module Name | Version |
|-----------------------------------|---------------------------|---------|
| magento/module-admin-notification | Magento_AdminNotification | 100.0.2 |

To install single extension, click on install button besides to that particular extension. And to install multiple extensions, select all the extensions you want to install and select a bulk install action from the top of the page.

| | | | | | |
|-------------------------------------|-----------------------------|---------|-----------------|---------|-------------------------|
| <input type="checkbox"/> | magento/module-deploy | 100.0.2 | magento2-module | magento | Install |
| <input type="checkbox"/> | magento/module-developer | 100.0.2 | magento2-module | magento | Install |
| <input checked="" type="checkbox"/> | magento/module-dhl | 100.0.2 | magento2-module | magento | Install |
| <input type="checkbox"/> | magento/module-directory | 100.0.2 | magento2-module | magento | Install |
| <input type="checkbox"/> | magento/module-downloadable | 100.0.2 | magento2-module | magento | Install |

It will start downloading extension/s.

1. Start a Readiness Check

The first step for any extension installation is, readiness check. Which will check if your Magento 2 installation has all the required necessary components for the extension installation or not. Click on the **Start Readiness Check** button.

Readiness Check Create Backup Component Install

Back Next

Step 1: Readiness Check

Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.

Start Readiness Check

After the check has been completed and your installation covers all of the requirements, you will be able to proceed by clicking on the **Next** button.

If you have a component marked as red, you will have to fix it first. You will be able to check how to fix the issues with it by clicking on the link below it. This will direct you to the official Magento 2 documentation section where you will find a guide on that matter. If everything is okay, you can click on next button.

Readiness Check Create Backup Component Update

Try Again Back Next

Step 1: Readiness Check

✓ **Completed!** You can now move on to the next step.

- ✓ **Check Updater Application Availability**
Updater application is available.
- ✓ **Check Cron Scripts**
Cron script readiness check passed.
- ✓ **Check Component Dependency**
Component dependency is correct.
- ✓ **PHP Version Check**
Your PHP version is correct (5.6.10).
- ✓ **PHP Settings Check**
Your PHP settings are correct.
- ✓ **PHP Extensions Check**
You meet 12 out of 12 PHP extensions requirements. [Show detail](#)

2. Backup your Data

The second step involves creating a backup on your store. We have recommended you to do this at the start of this tutorial as sometimes the integrated Magento backup system will not create a proper backup of your data which is something you want to avoid at all costs.

You can de-select the backup options here and click on the Next button or click on Create Backup if you have selected an option.

1 Readiness Check 2 Create Backup 3 Component Update 4 Home

Back Next

Step 2: Create Backup

 We'll put your store in maintenance mode to protect your shoppers during the upgrade. You cannot cancel this upgrade process.

Backup Options

- Code
- Media
- Database

Let's check your disk space availability for taking selected backups, and then create the backups.

Create Backup

If you choose later, you will receive a confirmation screen that the backup has been successfully created and then you can hit the **Next** button to proceed.

1 Readiness Check 2 Create Backup 3 Component Update 4 Home

Try Again Back Next

Step 2: Create Backup

✓ **Completed!** You can now move on to the next step.

- ✓ **Disk space available**
You have enough space available in disk for taking your selected backups.
- ✓ **Store in maintenance mode**
Your store will be in maintenance mode until you complete the update and maintenance mode is automatically lifted.
- ✓ **Backup created**
The backup files can be found in Magento Admin's backup management.

The backup files are located in:

3. Install the Extension

In the last step, you will see again the extension/s you wanted to install. Click on the Install button to continue.

Once the installation has been completed, you will receive a confirmation and ability to go back by clicking on the **Back to Setup Tool** button.

Congratulations, the extension is successfully installed.

Forgot Password popup (To recover a password)

The screenshot shows a checkout page with a 'FORGOT PASSWORD' popup. The popup is centered and contains the following text: 'FORGOT PASSWORD', 'Please enter your email address below. You will receive a link to reset your password.', and a text input field labeled 'Email Address *'. Below the input field are two buttons: 'Back to Login' and 'SUBMIT'. The background shows a checkout form with sections for 'SHIPPING METHOD' and 'PAYMENT METHOD'. The 'PAYMENT METHOD' section has radio buttons for 'Check / Money order' and 'Cash On Delivery'. Below that is an 'Order Summary' section with 'Cart Subtotal', 'Shipping Flat Rate - Fixed', and 'Order Total'. At the bottom, it says '1 Item in Cart' and lists 'Layla Tee \$29.00' with 'Qty: 1' and a 'View Details' link. A 'Login' button is visible in the bottom left of the background.
