

I. Installation

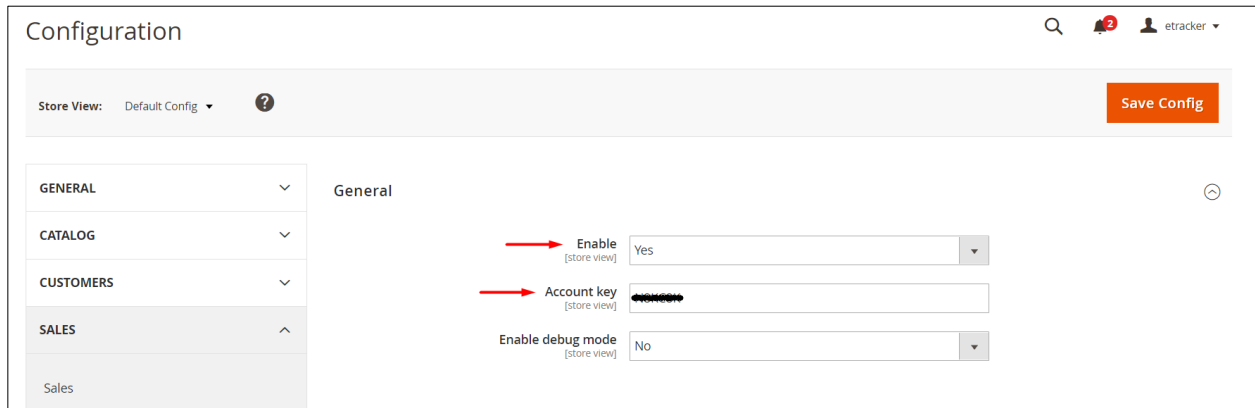

To install the module, please follow the instructions listed in the [Magento Marketplace Installation Guide](#).

II. General Configuration

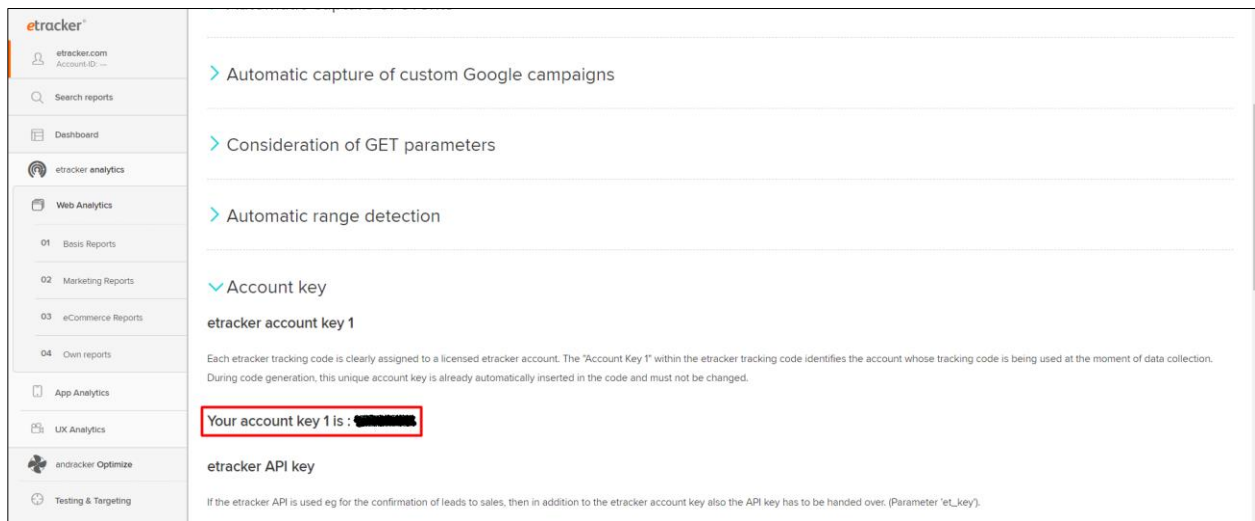

After the successful installation of the module, the admin must navigate to **Stores -> Configuration -> Sales -> eTracker**

Enable – when this option is changed to “YES”, the eTracker **Account key** field is shown.

Account key – to find your **Account key**, log in to your [eTracker application](#) and navigate to Account info ->Settings -> Account -> Account key.

Enable debug mode – if the option is set to “YES”, debugging logs will be shown in console.

Note: When Debug mode is set to “YES”, eTracker will **not** record **order data**.
