

Installation:

Step 1 (File Installation)

Disable the cache of Magento store

System -> Cache Management

Disable the Compilation

System -> Tools -> Compilation

Upload All the extension files to root directory of your Magento store or you can upload package from the admin system -> magento connect

Folder of Extension in the .tgz file

app/

js/

var/

Step 2 (License Configuration)

You can get license key with your order OR You can ask your license key from our support (www.solution4magento.com)

Example Key : XXXX-XXXX-XXXX-XXXX-XXXX-XXXX-XXXX-XXXX

Select the "Current Configuration Scope" to Default Config

After Insert the License Key Click on Save Config Button (right top)

If you Key is Valid then You got a Menu in top Called "Evirtual Xautoimport"
