Responsive Banner Extension With Grid Widget Templates

User Manual

Version 1.1

Date
10/19/2018

| About The Extension

Responsive Banner extension for Magento 2 extends native Magento banner functionality and provides an ability to manage banner widget, enable bullets, specify rotation frequency and speed. Responsive Banner is the easiest and most effective way to show a series of images or video to highlight your promotions, sales and discounts, or new products. Extension allows to use different images for desktop, tablet and mobile versions.

The Grid Widget Templates provides an additional ability to create a widget using grid templates. This will allow you to manage widget content and create complex grids for banners without any development – just choose a template and select suitable banners. You will be able to see grid widget on desktop, tablet and mobile devices.

| Back-office Features

- Upload images to banner in the image management tab, different images can be uploaded for the desktop/ mobile version.
- Upload video in MP4 to banner;
- Specify link to the uploaded image (product / category / custom);
- Specify navigation titles for the bullets on the widget;
- Enable loop for the widget;
- Specify rotation speed;
- Widget templates are created to manage grid widget content. The following widget templates could be used:
 - Three Blocks Widget;
 - Six Blocks Widget;
 - Eight Blocks Widget;

| Storefront Features

- Widget with rotating banners.
- Navigation between banners using navigation titles or bullets.
- Ability to run video in a banner (video could have video preview or image preview).
- Widget with 3 / 6 / 8 banners

| Initial Configuration

Stores > Configuration > Ewave Extensions > Responsive Banner

Setting Name	Values	Description
Image type	Jpg,jpeg,gif,png	Text field to specify image types allowed to upload for a banner
Image MIME type	Image/jpeg,image/png	Text field to specify image MIME types allowed to upload for a banner

| Responsive Banner in back-office

Step 1. To create Responsive Banner widget you have to create banners first. Please go to Content > Banners and click "Add Banner" button. On the banner detail page you can see a new tab "Images and Videos", open it and upload image or video (mp4) file.

When image is uploaded you will be able to add one more image using the link. You are able to specify a role for uploaded images. You have to click on the uploaded image, popup appears where you can choose the role for image (not a multiselect, 1 image = 1 role). Then close popup and selected role will be shown under the image.

The screenshot displays the Ewave back-office interface. On the left is a vertical navigation menu with icons for Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, and System. The main content area shows the 'admin' user profile at the top right. Below it are navigation buttons: Back, Delete Banner, Reset, Save and Continue Edit, and a prominent red Save Banner button. A yellow success message states 'You saved the banner.' Below this is the 'BANNER INFORMATION' sidebar with links for Banner Properties, Content, Related Promotions, and Images and Videos. The 'Images and Videos Management' section features an 'Add Video' button and a grid of image thumbnails. One thumbnail shows the 'ewave.' logo. Below it, a role selector dropdown is open, listing options: Rotator - Mobile, Rotator - Tablet, Rotator - Desktop (selected with a blue highlight and a green arrow), Grid Widget - Square mobile, Grid Widget - Square desktop/tablet, Grid Widget - Rectangle mobile, and Grid Widget - Rectangle desktop/tablet. Below the image grid, an 'Alt text' field contains the value 'admin', with a green arrow pointing to the field.

Note: if you will add an image which doesn't fit specified role aspect ratio – image will be shown with a white stripes indicating a space which doesn't fit the role.

To upload a video click on "Add Video" button. New Video popup displays where you can add the file and set other options for the video banner.

The 'New Video' popup form contains the following fields and options:

- Title:** Text input field.
- Use video as a Preview:** Dropdown menu set to 'No'.
- Preview Image:** 'Choose File' button, 'No file chosen' text.
- Video:** 'Choose File' button, 'No file chosen' text, 'Max allowed file size 2M' note.
- Play video automatically for desktop:** Dropdown menu set to 'No'.
- Play video automatically for mobile:** Dropdown menu set to 'No'.
- Play video in a loop:** Dropdown menu set to 'No'.
- Allow Video Popup:** Dropdown menu set to 'No'.
- Role:** Dropdown menu with options: Desktop, Mobile, Tablet.

Note: Only 1 video can be added to a banner. After that "Add Video" button will be disabled. Preview image is default Magento placeholder.

The dashboard shows the following elements:

- Navigation:** Dashboard, Sales, Catalog, Customers, Marketing, Content, Reports, Stores, System, Find Partners & Extensions.
- Admin Header:** Search, Notifications, User (admin).
- Actions:** Back, Delete Banner, Reset, Save and Continue Edit, Save Banner.
- Message:** You saved the banner.
- BANNER INFORMATION:** Banner Properties, Content, Related Promotions, Images and Videos.
- Images and Videos Management:** Placeholder image with 'No Role' label, 'Click here to add images.' link, 'Add Video' button (highlighted with a green arrow), and 'Alt text' field with value 'admin'.

Also you are able to add link to category or product to the banner using new link types. Select Link type in dropdown > Choose product or select category and save banner.

Limitations:

- Video banners cannot be used for Grid Widget
- Video format allowed for banner is MP4 only

Step 2. Create a widget with “Responsive Banner” type. Under the Widget Options tab you can select banners and specify additional settings.

Widgets ← Back Delete Reset Save and Continue Edit **Save**

<input checked="" type="checkbox"/>	ID ↑	Banner	Banner Type	Visibility	Status	Position
Yes ▾	From To					
<input checked="" type="checkbox"/>	15	vk banner 7			Active	3
<input checked="" type="checkbox"/>	11	VK video banner			Active	2
<input checked="" type="checkbox"/>	10	VK ban			Active	1

Rotation Speed * 3

Autoplay Yes ▾

Lazy Load * No ▾

Loop * Yes ▾

Use static template * Yes ▾
Used only when insert widget in wysiwyg. When create on widget creation page you can select static template in layout section

Enable Breadcrumbs Bullets ▾

Step 2. On the new widget page under “Widget Options” tab you have to specify the template for 3, 6 or 8 blocks and 3, 6 or 8 banners according to the template. Visual example of the selected grid will be under selection dropdown, numbers in the template is a banner position.

✓ The widget instance has been saved.

Specify Banners * Search Reset Filter 3 records found 20 per page 1 of 1

<input checked="" type="checkbox"/>	ID	Banner	Banner Type	Visibility	Status	Position
<input checked="" type="checkbox"/>	9	VK banner 3			Active	1
<input checked="" type="checkbox"/>	8	VK Banner 2			Active	3
<input checked="" type="checkbox"/>	7	VK banner 1			Active	2

If qty of banners is not equal the number of blocks in template you will see a notification message.

| Banner rotator on storefront.
