

How to install Ewave Extensions:

1. Backup your web directory and store database;
2. Download the extension(s) installation package(s);
3. Navigate to your store root folder in the SSH console of your server:

```
cd path_to_the_store_root_folder  
and create Ewave vendor directory:  
mkdir -p app/code/Ewave
```

4. Upload the contents of the extension(s) installation package(s) to your store /app/code/Ewave directory;
5. Run the following commands from your store root directory:

```
php -f bin/magento module:enable {Extension Name} (eg.  
Ewave_Attributematrix, no spaces and other symbols)  
then:  
php -f bin/magento setup:upgrade  
after:  
php -f bin/magento setup:static-content:deploy
```

6. Flush the store cache;
7. Log out from the backend and log in again.
