

EXPERTREC SEARCH EXTENSION USER GUIDE

INSTALLATION

Expertrec can be installed via Magento admin panel or manually.

Installation via Magento admin panel

The detailed instruction on installation via Magento admin panel can be found in [Magento HelpDocs](#).

Manual Installation

1. Download the Expertrec extension package to your local machine from the Magento Marketplace. All commands are run from Magento root folder from the terminal/Developer console.
2. Create folder using command

```
> mkdir -p app/code/Expertrec/ExpertrecSiteSearch
```
3. Extract the content of the archive to app/code/Expertrec/ExpertrecSiteSearch subfolder.
4. Run the following command:

```
> php bin/magento setup:upgrade
```
5. Check the extension status

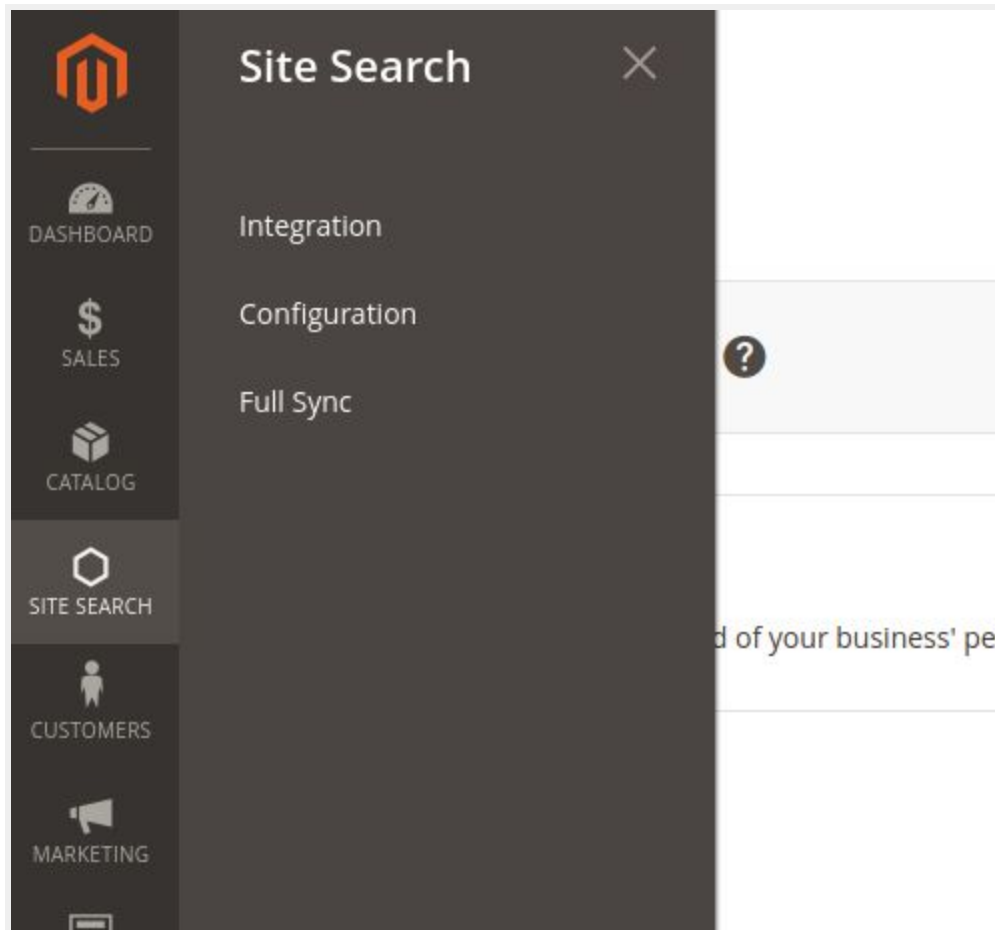

```
> bin/magento module:status
```
6. Enable the extension (if needed)

```
> bin/magento module:enable Expertrec_ExpertrecSiteSearch  
--clear-static-content
```

After Installation of this Extension, it will start indexing the product catalog. The default search functionality will be replaced with Expertrec search. Sit back and relax, you are done.

Advanced configuration for Multi store Magento

After Successful Installation, you can see a new entry added in Magento admin panel.

CONFIGURATION

For the first store view, configuration data will be generated by the extension on installation. If you want to add search functionality to other stores you can generate additional accounts from our [dashboard](#). You will get a Client Id key and Client Secret Key for your account. Which can be added to the appropriate store.

Configuration data will be available at the store view only.

CONTENT

Full feed update happens daily, without user intervention.

What will it do?

It will send complete feed for reindexing.

When should you do it?

You should not need to do the full feed update as it happens periodically if you have any discrepancies in results or if your imported bunch of products is not reflected in your results even after some time has passed then...

How much time it will take?

It will depend on your feed size as well as internet connection.
