INTRODUCTION

The extension allows adjusting the use of cookies to the General Data Protection Regulation statements. Cookie Mode Pro is user-friendly and easy in its customization. The module tracks first- and third-party cookies. With the help of it, you can show a popup about cookie use just as a visitor has his first interaction. Besides, the extension allows customers to enable or disable different categories of cookies right on your website.

Main Features:

- **Show popup for use of cookies.** Display a cookie popup for visitors to accept.
- **Write your message for popup.** Customize the text of a cookie popup.
- **Create cookie categories.** Add an unlimited number of cookie groups for customers to enable/disable them.
- **Enable 'Cookie Settings'.** Let customers select which cookie categories are allowed to be stored.
- **Improve 'Cookie Settings' page with descriptions.** Add additional information to each cookie category.
- **Customize 'Cookie Settings' for multiple store views.** Change the text and language for the elements.
- **Display or hide list of cookies.** Let customers see what cookies are included into a certain category or you can disable showing this information.
- **Let customers memorize their settings.** Once they accepted and configure cookie usage, the system saves them.

General Settings

The screenshot shows the 'Configuration' page for 'General Settings'. At the top, there is a 'Store View' dropdown set to 'Default Config' and a 'Save Config' button. Below this, the 'EXTAIT MODULES' section is expanded to show 'General Settings'. Three settings are visible: 'Enable Module' (dropdown set to 'Yes'), 'Display Cookie List in Categories' (dropdown set to 'Yes'), and 'Cookie Restriction Message' (editor with a 'Show / Hide Editor' button). The editor contains a sample text: 'This site uses data saved in the cookie files and other technologies to help with navigation and give you an opportunity to provide feedback, analyse your use of our products and services. Also, help us with promotional and marketing efforts, and provide content from third parties. Click [here](#) for more information about Privacy Policy. If you agree to use cookie files click 'Allow Cookies'. Otherwise, click 'Cookie Settings' to allow or prohibit some cookie categories.'

Select 'Yes' to enable this module.

Select 'Yes' to display the list of cookies on the 'Cookie Settings' page on the storefront.

Enter the text for a message which will be displayed as a cookie notice on the storefront.

Cookie Notice on the Storefront

The screenshot shows a storefront with several promotional banners. At the top, a woman in a yellow shirt meditates on a beach. Below her is a banner for the 'New Luma Yoga Collection' with a 'Shop New Yoga' button. Further down, there are banners for '20% OFF Luma pants' and 'Even more ways to mix and match' (Buy 3 Luma tees get a 4th free). At the bottom, a yellow cookie notice is overlaid, containing the text: 'This site uses data saved in the cookie files and other technologies to help with navigation and give you an opportunity to provide feedback, analyse your use of our products and services. Also, help us with promotional and marketing efforts, and provide content from third parties. Click here for more information about Privacy Policy. If you agree to use cookie files click 'Allow Cookies'. Otherwise, click 'Cookie Settings' to allow or prohibit some cookie categories.' Below this text are two buttons: 'Allow Cookies' and 'Cookie Settings'.

A user needs to click this button to accept the use of cookies.

When a user clicks 'Cookie Settings' he/she is redirected to the 'Cookie Settings' page. On this page, a user can accept or refuse some of the cookie categories.

When a customer allows cookies or configures them, the cookie notice disappears from the storefront.

Link in the Footer

The screenshot displays two product cards. The first card is for a 'Radiant Tee' priced at \$22.00 with a 3-star rating and 3 reviews. The second card is for a 'Breathe-Easy Tank' priced at \$34.00 with a 4-star rating and 2 reviews. Both cards feature an 'Add to Cart' button, a heart icon, and a share icon.

The footer contains a list of links: 'About us', 'Customer Service', 'Cookie Settings' (highlighted with an orange underline), 'Privacy and Cookie Policy', 'Search Terms', 'Orders and Returns', 'Advanced Search', and 'Contact Us'. To the right of the footer is an email subscription form with the placeholder text 'Enter your email address' and a 'Subscribe' button.

Besides the link in the cookie restriction message, a customer can go to the 'Cookie Settings' page from the footer.

CATEGORY

Category Grid

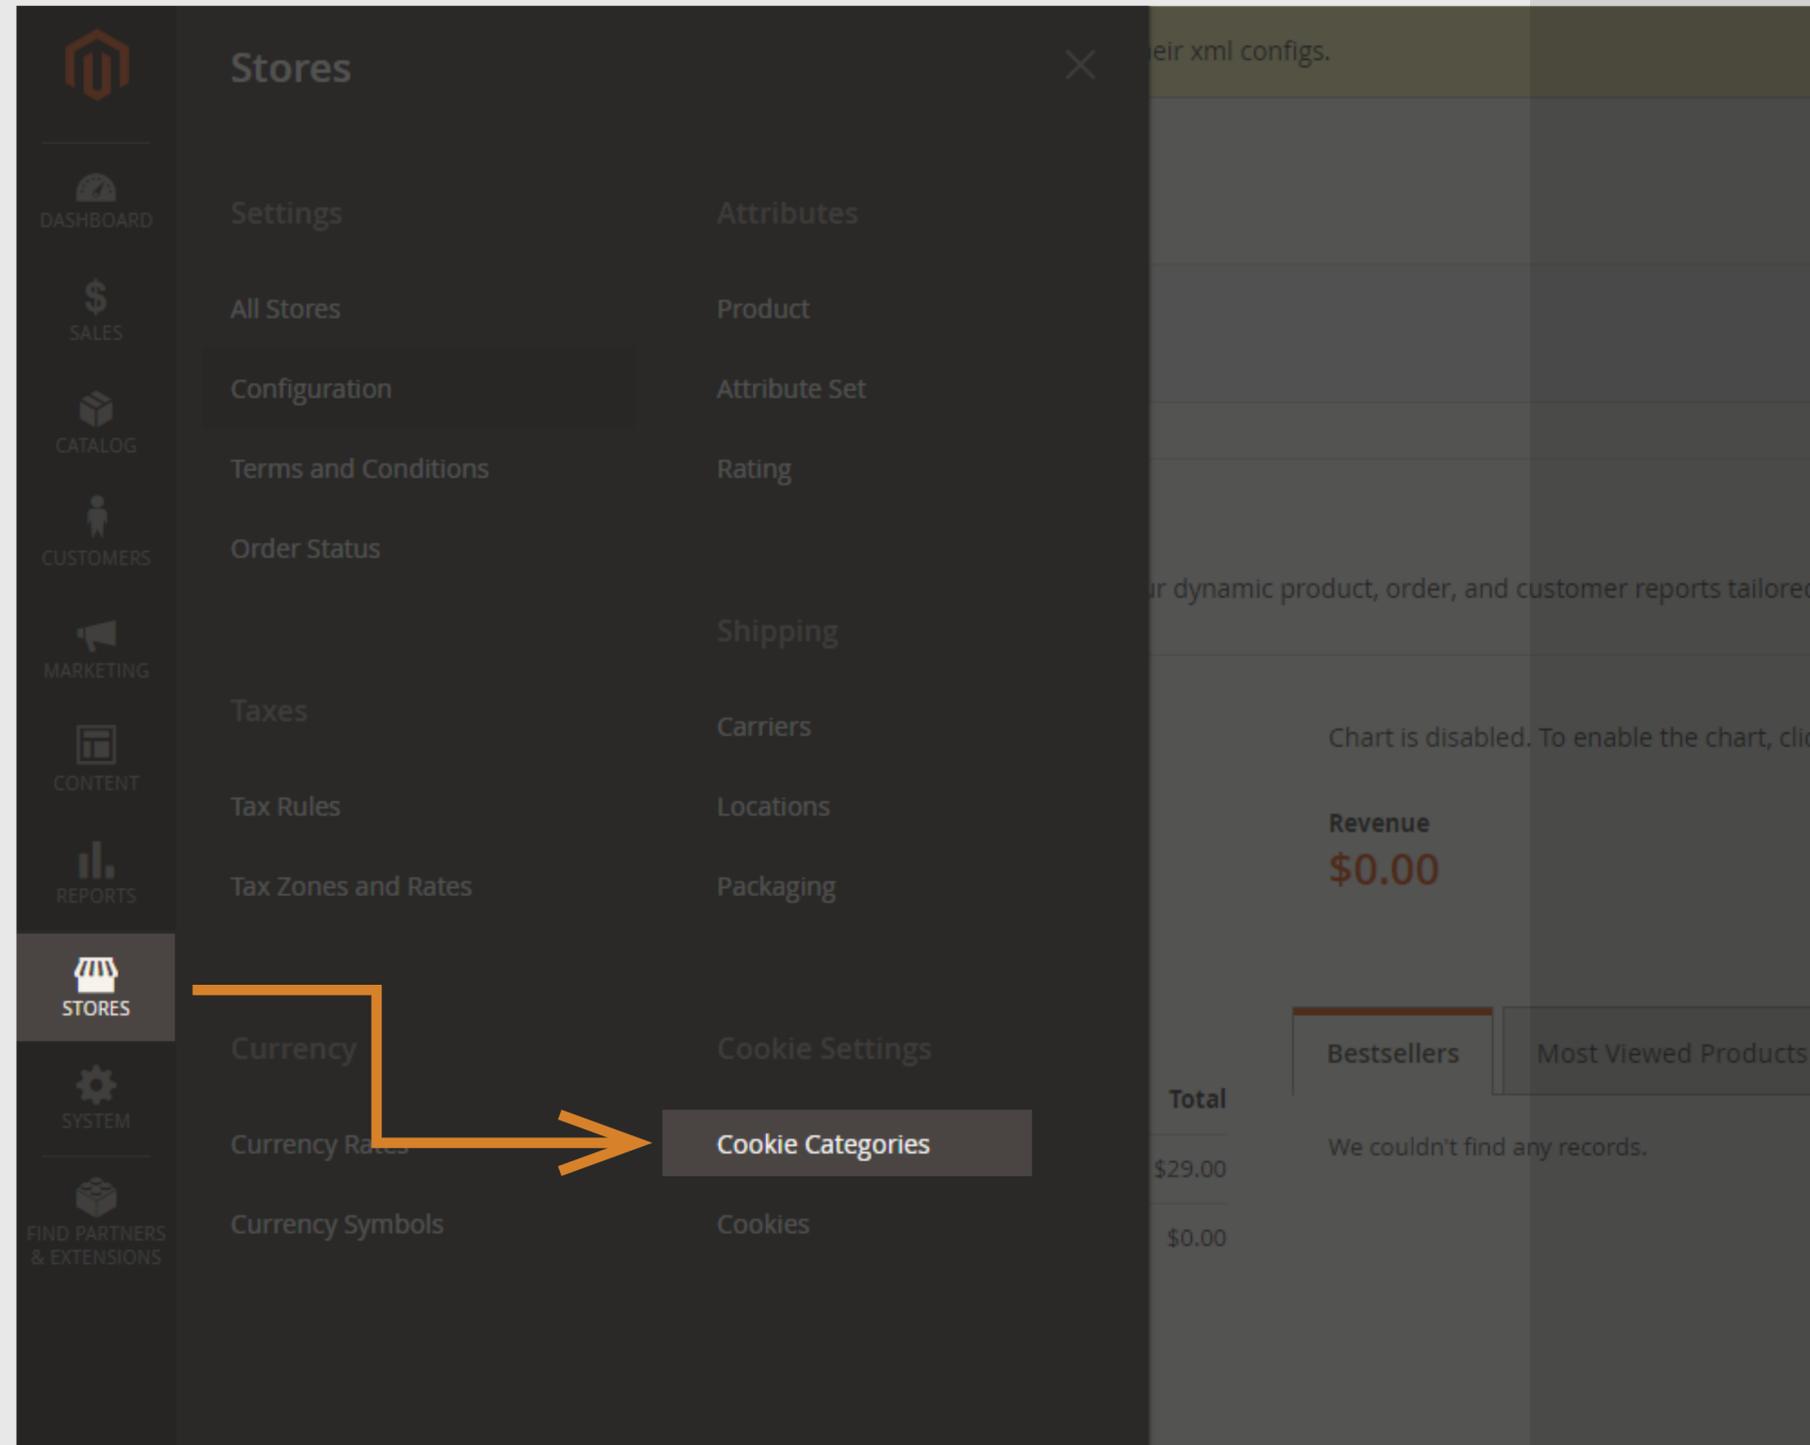

On the 'Cookie Settings' page, a user can see categories of cookies, which he/she can accept or refuse.

To create different categories, go to Admin Panel

Stores

Cookie Categories

When the module is enabled, the default 'System', 'Marketing' and 'Google Analytics' categories are placed on the grid.

Click this button to create a new category.

Add Category

Click this button to change the name and description of a category, as well as to rearrange cookies included into it.

Description

← Back Save

Enter the name of a category.

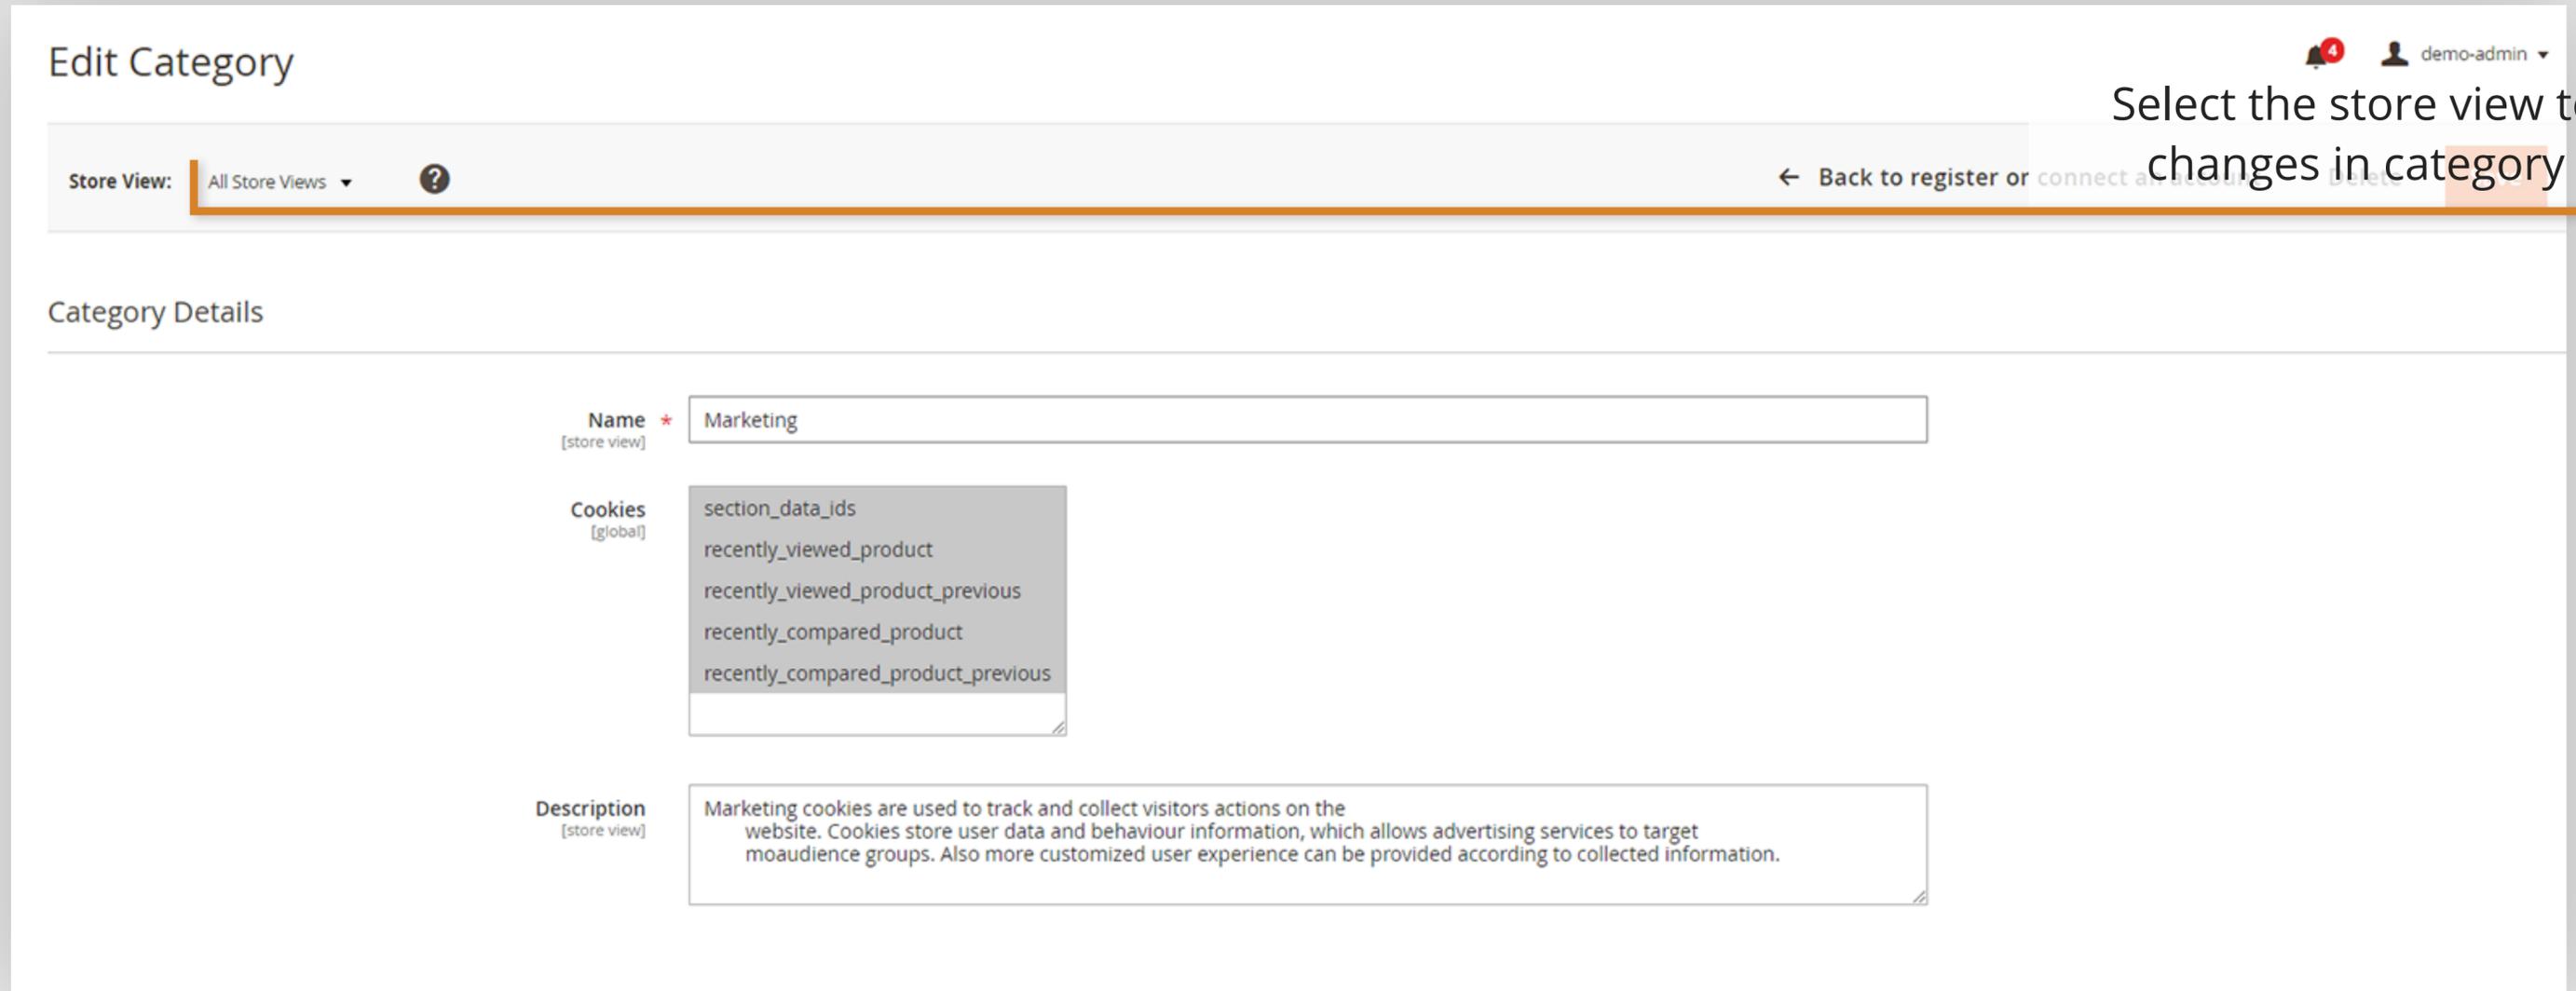

Enter a description of this category, which will be displayed on the storefront.

Select cookies, which will be included into this category. In this field cookies not being linked to any category are displayed.

When you select some cookies for one category, these cookies will be unavailable for another category. To relink cookies included into a particular category, go to the 'Cookie Categories' grid and click 'Edit'. In the 'Cookie' multi-select list, select cookies which you want to remain here. Cookies, which you don't select, become available for other categories and new ones.

Store View Settings for Category

To change the description and name of a category for a particular store view go to the 'Edit Category' page.

Select the store view to make changes in category details.

* If you alter the cookies included to this category, the cookies are changed on all store views.

[Report Bugs](#)

Enter the cookie name.

Enter the description for a cookie, which will be displayed on the storefront.

Select a category to link this cookie to it.

Store View Settings for Cookie

To change the description of a cookie for a particular store view go to the 'Edit Cookie' page.

The screenshot displays the 'Edit Cookie' interface. At the top left, the title 'Edit Cookie' is visible. In the top right corner, there is a notification bell with a red '4' and a user profile icon labeled 'demo-admin'. Below the title bar, the 'Store View' dropdown is set to 'All Store Views'. A dropdown menu is open, showing the following options: 'All Store Views', 'Main Website', 'Main Website Store', and 'Default Store View'. To the right of the dropdown, there are three buttons: 'Back to register or connect an account', 'Delete', and 'Save'. The main form area contains three fields: 'Name' (global) with the value '_gid', 'Category' (global) with the value 'Google Analytics', and 'Description' (store view) with the value 'Used to distinguish users.'. At the bottom left, the footer text reads 'Copyright © 2018 Magento Commerce Inc. All rights reserved.'. At the bottom right, it says 'Magento ver. 2.2.4' with a link to 'Report an Issue'.

Select the store view to make changes in 'Cookie Details'.

Cookie Settings Page on the Storefront

A customer can turn on/off the use of a cookie category with a toggle button.

Cookie Settings

System Cookies

Necessary cookies enable core functionality of the website. Without these cookies the website can not function properly. They help to make a website usable by enabling basic functionality.

[LIST OF COOKIES THE SYSTEM CATEGORY COLLECTS](#) v

Marketing Cookies

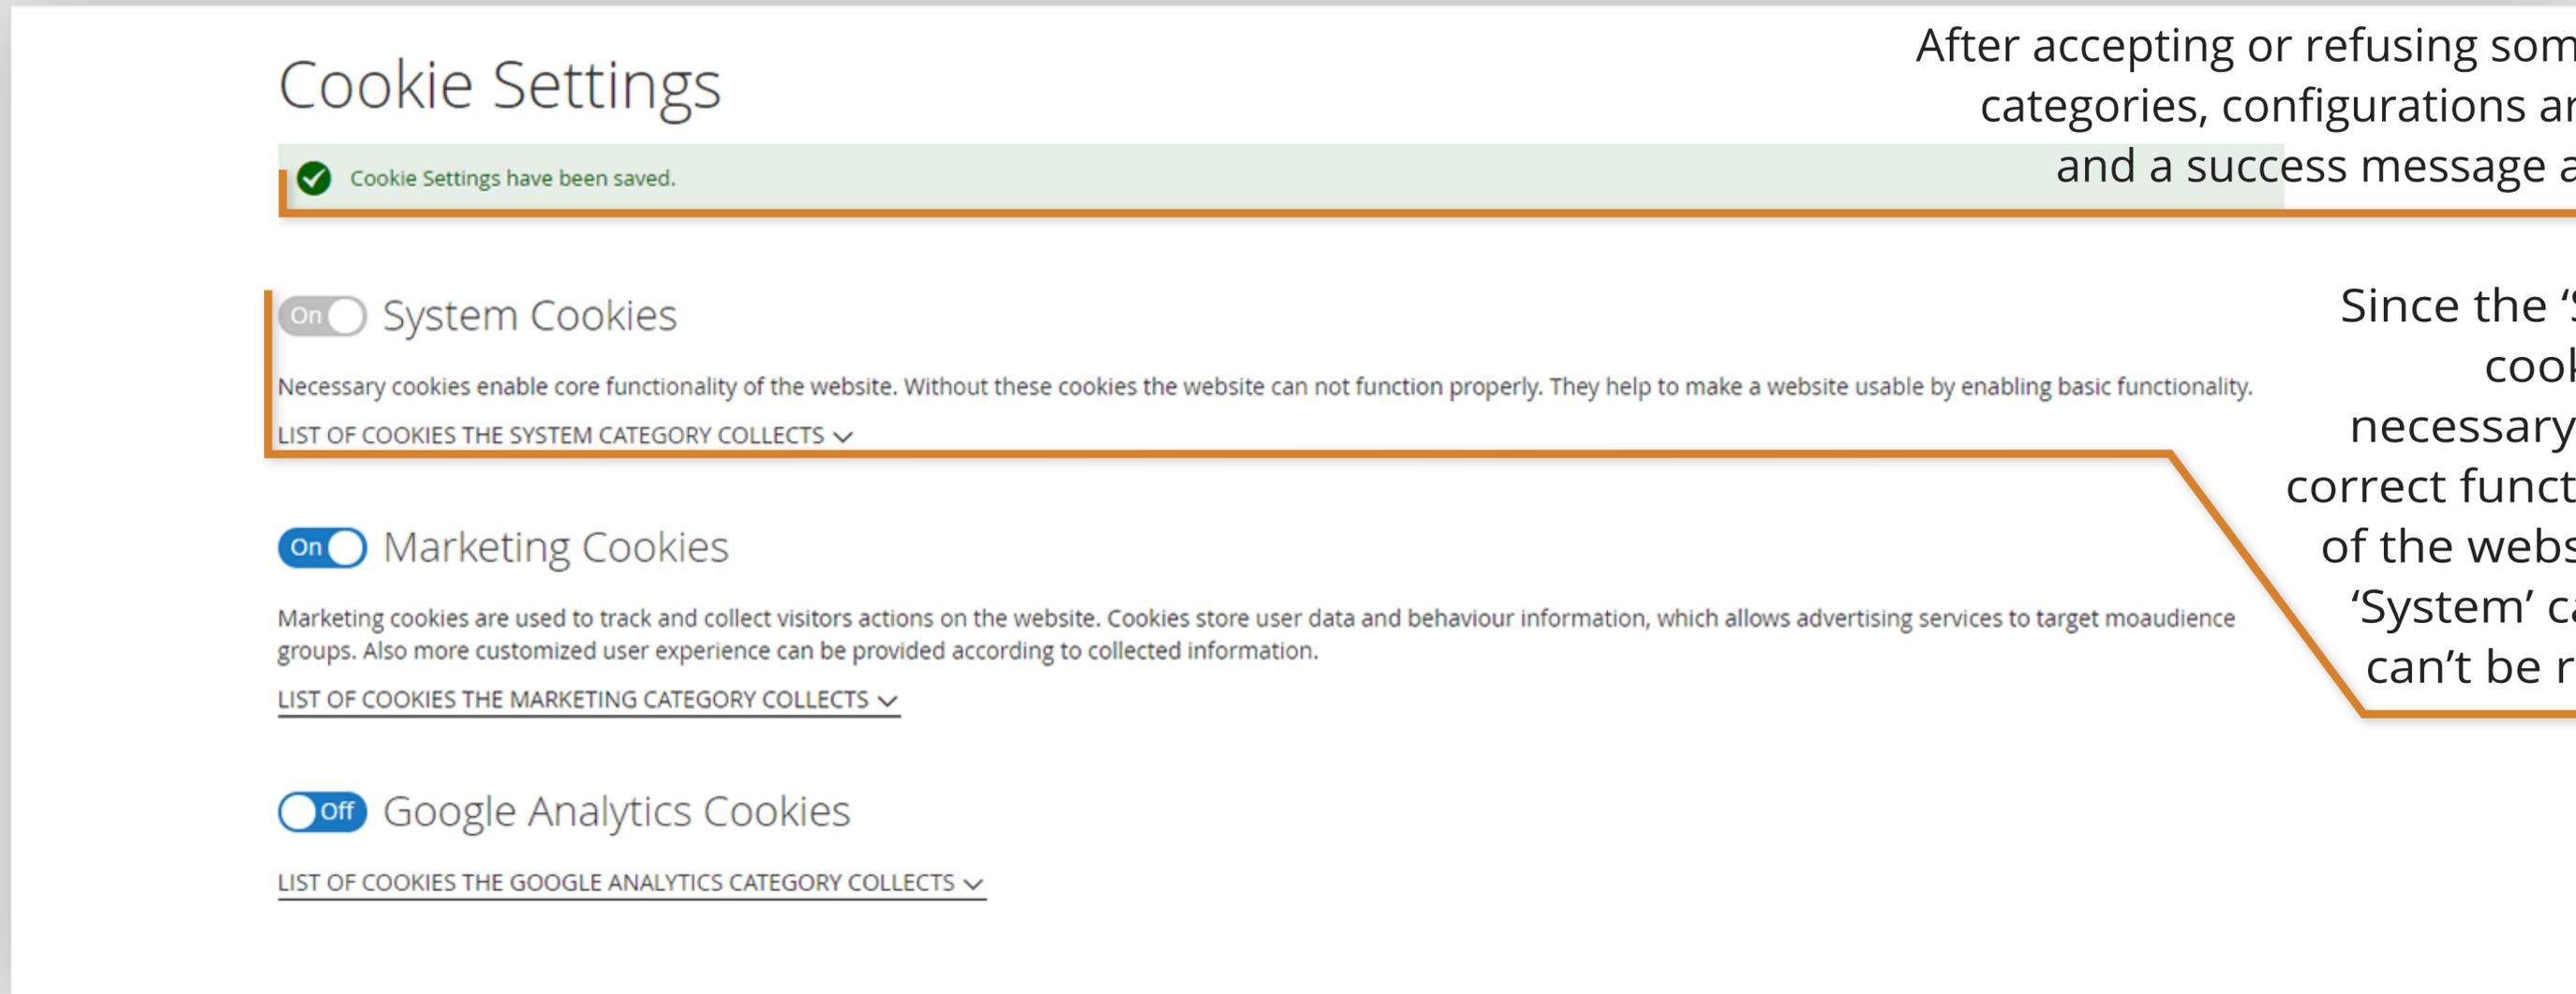

Marketing cookies are used to track and collect visitors actions on the website. Cookies store user data and behaviour information, which allows advertising services to target moaudience groups. Also more customized user experience can be provided according to collected information.

[LIST OF COOKIES THE MARKETING CATEGORY COLLECTS](#) ^

Cookie Name	Cookie Description
section_data_ids	Stores customer-specific information related to shopper-initiated actions such as display wish list, checkout information, etc.
recently_viewed_product	Stores product IDs of recently viewed products for easy navigation.
recently_viewed_product_previous	Stores product IDs of recently previously viewed products for easy navigation.
recently_compared_product	Stores product IDs of recently compared products.
recently_compared_product_previous	Stores product IDs of previously compared products for easy navigation.

A customer can click it to open the list of cookies.

For third-party cookies to work correctly as well as to have the possibility to enable/disable them, it is needed to insert js-code (which set them) after the Extait_Cookie:js/cookie.js component. To implement it you can include Extait_Cookie:js/cookie.js component (see README.md in Extait_Cookie module) into your component.

After accepting or refusing some of the categories, configurations are saved and a success message appears.

Since the 'System' cookies are necessary for the correct functionality of the website, the 'System' category can't be refused.

*If you use Magento 2.1 and a customer disables the 'Google Analytics' category, the 'Google Analytics' cookies continue to be used.

Thank you for buying our extension!
