

Connect your Magento account to Facebook

Below are instructions on how to install facebook business extension for magento2 on your dev instance. Before installing, verify your Magento cron job is up and running, read more about it on [this page](#). Make sure to test that the extension was installed correctly before shipping the code to production.

1. Login to your server instance.
2. Expand the facebook-business_extension-1.2.5.zip file.
3. Execute command `cd /var/www/Magento/app/code` or `cd /var/www/html/Magento/app/code` based on your server Centos or Ubuntu. Your path might be different based on your installation choice, in case you can't find it, look for `/var/www/html/magento2/app/code` or `/var/www/magento2/app/code`.
4. Create the following path—`app/code/Facebook/BusinessExtension`
5. Make sure you have the [correct read/write permissions](#) on your Magento root directory.
6. Copy all the extracted files from the facebook-business_extension-1.2.5 directory to the `app/code/Facebook/BusinessExtension` path that you've just created.
7. Move to Magento root folder by executing command `cd ../../..`.
8. Execute the following commands to install Facebook Business Extension:
 1. Install the Facebook Business SDK for PHP: `composer require facebook/php-business-sdk`. This dependency is used by the extension.
 2. You will see a message similar to: ``Installing facebook/php-business-sdk (8.0.0): Downloading (100%)``.
 3. Execute `php bin/magento module:status`.
 4. You must see `Facebook_BusinessExtension` in the list of disabled modules.

5. To enable module execute `php bin/magento module:enable Facebook_BusinessExtension`.
6. Execute `php bin/magento setup:upgrade`.
7. Execute `php bin/magento setup:static-content:deploy`.
8. Execute `php bin/magento setup:di:compile`.
9. Execute `php bin/magento cache:clean`.
10. Execute `php bin/magento cron:run` three times.
11. Optional if you are not the owner of Magento files.

```
chmod -R 755 ./
chmod -R 777 var/
chmod -R 777 pub/
chmod -R 777 app/etc
chmod -R 777 generated
```

9. Upon successful installation, login to your Magento Admin panel.
10. Select the stores icon in the main menu. There should be a section named Facebook --> Setup.
11. Select Setup to go to the Extension Installation Page.
12. Select Get Started to configure your Facebook Business Extension.
