Introduction:

Fenix provides delivery estimates for online retail websites based on various criteria. This extension is developed for Magento 2.x. It supports both the enterprise and community edition of Magento starting from version 2.2.

Installation:

Delivery Estimates extension can be installed through the composer as follows.

1. To Update Composer.json, change to the environment's root directory.
2. Identify the component name and version to be installed, here component name is **fenix/deliveryestimates** and version is **1.0.0**.
3. Perform the following command to update it.

```
composer require <fenix/deliveryestimates>:<1.0.0> --no-update
```

```
composer update
```

Alternatively, you can update your composer.json file ->"require" with the following:

```
"fenix/deliveryestimates": "^1.0.0"
```

4. Enter the credentials as requested to proceed with the installation
5. Wait until the composer finishes the installation without any errors.
6. Flush the magento cache through the command line using the command

```
php bin/magento cache:flush
```
7. Or flush the cache through the admin panel
