Getting Started!

Overview

Give customers the ability to add your products to cart without refreshing the page with Magento AJAX Add to Cart extension. This module saves the customers' time by allowing them to collectively purchase products without any delay or refreshing the page. It adds the item to the cart while customers are still browsing for more items. You can also enable other useful features in Magento quick add to cart module such as dialogue box, display related products and animations to facilitate your customers.

Extension Features

Ajax Loading Text & Image

- ✓ You can show custom message and image for the Ajax Loading Process depending on your requirements.

Show Related Products

- ✓ Display related products on continue dialogue box to facilitate customers into buying more products from your stores.

Product Fly To Cart

- ✓ Show flying animation of the product when being added to cart for better user experience

Customize Add To Cart Popup

- ✓ Magento AJAX cart extension allows you to adjust the settings of Cart Popup to show timer and continue shopping button for customer convenience

Configurable Product Options

- ✓ Allow customers to configure products such as order, size, color and other variable elements from the popup/listing page as well.

Ajax Based Header Cart

- ✓ Customers can open the Header Cart on the top right to view their added products in case of making immediate changes

User Guide

After installation of module, make sure the setup is upgraded and static-contents are deployed. Login to admin panel and flush you Magento cache storage.

I. How to Configure the Extension:

At the backend, go to Admin Panel > System > Configuration. Here you will have access to the following configurations:
