USER GUIDE

After installation of the module, make sure the setup is upgraded and static-contents are deployed. Login to the admin panel and flush your Magento cache storage.

HOW TO CONFIGURE THE EXTENSION

At the backend, go to **FME EXTENSIONS > Configurations**. Here you will have access to the following configurations:

GENERAL SETTINGS

- **Enable Module:** This will Enable/Disable canonical meta tag to any pages. (**Hint:** Select 'Yes' to add a canonical meta tag in meta header for any targeted page)
- **Exclude Canonical Meta Tag on These Pages:** Specify the pages to exclude or ignore canonical meta tag i.e.
 - To exclude canonical meta tag on product pages, use: '[catalog_product_view](#)'
 - To exclude canonical meta tag on CMS home page, use: '[cms_index_index](#)'
 - To exclude canonical meta tag on category pages, use: '[catalog_category_view](#)'
- **Canonical Meta Tag For Store URL (Cross Domain):** Choose the main domain for the pages from other domains that have identical content.
 - If "Default Store URL" all stores have their canonical Meta tags e.g. we have three stores. [Mystore.com](#) → [mystore.com/product](#), [Frenchstore.com](#) → [frenchstore.com/product](#), [Germanstore.com](#) → [germanstore.com/product](#). So, all three stores have their canonical Meta tags.
 - If "French Store View" (you have your list of stores listed in the dropdown) then all the stores have canonical meta tag with domain [frenchstore.com/product/---](#)

- **Canonical Meta Tag For Custom URL (Cross Domain):** Specify the domain for the pages from other domains that have identical content. It will add custom URL in the canonical Meta tag for the selected store e.g. we have selected "French Store View" from the "Canonical meta tag for store URL" configuration, so it will add custom URL to the canonical Meta tag in the French store pages custom URL in the canonical Meta tag for the selected store. E.g. we have selected "French Store View" from the "Canonical meta tag for store URL" configuration, so it will add custom URL to the canonical Meta tag in the French store pages. Suppose the custom URL is <http://mystore.com> then Frenchstore.com/product/→mystore.com/product/
- **Trailing Slash For Canonical Meta Tag:** Choose to end the URLs with a trailing slash. Add or Crop trailing slash to the pages without suffix .html or .htm (**Note:** trailing slash can be added to the pages without suffix .html or .htm)

CATEGORY CANONICAL TAGS

- **Category Canonical Enabled:** Enable/Disable canonical meta tag to any category
- **Add Canonical Meta Tag to Catalog Pagination Pages:** If "Yes" canonical meta tag will be added on category or product listings pagination page e.g. pages ending with: ?p= 1, ?p=2, ?p=3 etc. E.g. Category page like

<http://mag2-seo.myextensions.net/canonicalurls/men/tops-men/jackets-men.html?p=2>

- If “Add canonical meta tag to catalog pagination pages” is “Yes”, then the canonical meta tag will be like `<link rel="canonical" href="http://mag2-seo.myextensions.net/canonicalurls/men/tops-men/jackets-men.html?p=2" />`
- If “No”, canonical meta tag will be like `<link rel="canonical" href="http://mag2-seo.myextensions.net/canonicalurls/men/tops-men/jackets-men.html" />`
- **Add Canonical Meta Tag to Catalog Layered Navigation:** Choose to add the canonical meta tag to:
 - Current Category
 - Filtered Page or
 - Disable this feature
- a) If “Yes”, for the Filtered Page” canonical Meta tag will be added to the filtered category. E.g. We have a filtered category like:
 - http://mag2-seo.myextensions.net/canonicalurls/men/tops-men.html?cat=14&style_general=120

Then the canonical meta tag will be:

- `<link rel="canonical" href="http://mag2-seo.myextensions.net/canonicalurls/men/tops-men/jackets-men.html?style_general=120" />`
- b) If “Yes”, for the Current Category” canonical Meta tag will be added to the current category. E.g. We have a category page like:
 - http://mag2-seo.myextensions.net/canonicalurls/men/tops-men.html?cat=14&style_general=120

Then the canonical Meta tag will be:

- `<link rel="canonical" href="http://mag2seo.myextensions.net/canonicalurls/men/tops-men.html"/>`
- **Add rel="next" and rel="prev" to Catalog Pagination Pages:** Use the `rel=next/prev` tag to inform Google, where exactly the 1st and the last pages are and treat these pages as a logical sequence.

Category Canonical Tags

Category Canonical Enabled <small>[store view]</small>	Yes
Add canonical meta tag to catalog pagination pages? <small>[store view]</small>	Yes
Add canonical meta tag to catalog layered navigation ? <small>[store view]</small>	Yes, For the Filtered Page
Add rel="next" and rel="prev" to catalog pagination pages? <small>[store view]</small>	Yes

PRODUCT CANONICAL TAGS

- **Product Canonical Enabled:** Enable/Disable canonical meta tag to any product
- **Include Category Path:** Select Yes/No to include/exclude category path to any product canonical meta tag
- **Category Path Structure:** If you select 'Yes' in the above field, only then this field will show where you have to specify the structure of the category path as:
 - Include Main Categories Only
 - Include Sub-Categories with Main Category

Product Canonical Tags

Product Canonical Enabled <small>[store view]</small>	Yes
Include Category Path <small>[store view]</small>	Yes
Category Path Structure <small>[store view]</small>	Include Sub Categories with Main Category

CMS CANONICAL TAGS

- **CMS Canonical Enabled:** Enable/Disable canonical meta tag to any CMS page

HOW TO ADD CANONICAL TAG TO CATEGORY

At the back end, go to [Catalog > Categories](#). Here you will find the list of all the categories. Select any category and provide Override Canonical URL.

The screenshot shows the 'Women (ID: 20)' category management page. On the left, a category tree is visible with 'Women (0)' highlighted in a red box. The main content area includes:

- Buttons:** 'Add Root Category', 'Add Subcategory', 'Delete', and 'Save'.
- Enable Category:** A toggle switch is turned on, labeled 'Yes'.
- Category Name:** A text input field containing 'Women'.
- Search Engine Optimization:**
 - URL Key:** A text input field containing 'women'.
 - Override Canonical Url:** A text input field containing 'donne-dududu'.
 - A checkbox labeled 'Create Permanent Redirect for old URL' is checked.

HOW TO ADD CANONICAL TAG TO CMS PAGE

At the back end, go to [Content > Pages](#). Here you will find the list of all the CMS pages. Click on [Edit](#) button to add a canonical tag to any CMS page.

Pages Add New Page								
ID ↓	Title	URL Key	Layout	Store View	Status	Created	Modified	Action
1	404 Not Found	no-route	2 columns with right bar	All Store Views	Enabled	Feb 1, 2019 9:52:07 AM	Feb 1, 2019 9:52:07 AM	Select ▼ Edit Delete View
2	Home Page	home	1 column	All Store Views	Enabled	Feb 1, 2019 9:52:07 AM	Oct 23, 2019 12:12:13 PM	

Here you will have to provide Override Canonical.
