USER GUIDE

After installation of the extension, make sure the setup is upgraded and static-contents are deployed. Login to the admin panel and flush your Magento cache storage.

HOW TO COPY CATEGORY OR SUB-CATEGORY

At the backend, go to **CATALOG > Categories**. Here you will find all the store categories. Click on any category and you will see a **Copy Category** button on the top right of the window. Click on this button to continue.

Here you will have to provide the following information:

COPY CATEGORY INFORMATION

- **Duplicate Category Using CLI:** Choose 'Yes' to generate CLI Command for creating a duplicate category or Choose 'No' for the normal flow.
- **Parent Category:** Select a parent category. If you don't select a category, the duplicated category will have no parent category.
- **Category Name:** Enter a new name for the duplicate category. If you left blank, a default name will be given to it.
- **Copy Related Products:** Option to copy the category with product relations

- **Copy Sub Categories:** Option to copy the category along with its sub-categories
 - **Sub Categories:** Select the sub-categories to copy Or leave empty to copy all the sub-categories
- **Copy Sub Category Products:** Option to copy the sub-categories along with their associated products
