Getting Started!

Overview

Magento GEOIP Language and Currency extension automatically switches the language and currency of your store as per the visitors' geographical preferences. This extension is backed with Maxmind database for the recognition of visitors' location. You can also allow customers to manually switch the language and currency of your online store.

Extension Features

Magento Change Currency

- ✓ Magento currency switcher extension automatically switches store currency as per the geo-location so that users can continue shopping in their local currency.

Magento Language Switcher

- ✓ The language of the store is also switched to native or easily understandable language depending on the visitors' location.

Detects User Location

- ✓ The geolocation of the users is automatically detected from their IP addresses so that they could be redirected to a suitable store view.

Auto & Manual Switching

- ✓ The manual switching can also be enabled to allow customers to switch between different store views and pay in a currency they are comfortable with.

MaxMind Database

- ✓ Import Maxmind database, which is a reliable source of IP addresses for enabling your store to detect users' geolocations.

IP Exceptions

- ✓ A section of IP Exceptions is added to ignore automatic switching rule for specific list of IP addresses.

User Guide

After installation of module, make sure the setup is upgraded and static-contents are deployed. Login to admin panel and flush you Magento cache storage.

I. How to Configure the Extension:

At the backend, go to STORES > Configurations. Here you will have access to the following configurations:

General Settings:

1. **Enable in Frontend:** Enable/Disable the extension.
2. **Auto Redirect:** Enable/Disable auto redirect feature.

General Settings

Enable in frontend
[store view]

Yes

Auto Redirect
[store view]

Enable

If enabled, the visitor will be redirected to the assigned store automatically

Footer Bar Settings:

1. **Suggested Text:** Set text for footer bar if auto redirect is disabled.

Choose Language

II. How to Import Countries List:

Go to Import Countries List:

At the backend go to “Import Country List”. You can go there from Admin Menu > FME EXTENSIONS. Here you will find all the information regarding importing country lists. Click on “Import Database” to import the country list.

Import Countries List

Important Notes

This Module uses MaxMind Country IP Database For GeoIP Information. MaxMind is very reliable and updates its database every month. You can download the latest database from [here](http://geolite.maxmind.com/download/geoip/database/) or copy the below URL into your browser <http://geolite.maxmind.com/download/geoip/database/>

Download the file GeoIPCountryCSV.zip (file size: 2.1M approx) and extract it to the /pub/media/geopdefaultlanguage folder inside magento.

Make sure that the file is named as GeoIPCountryWhois.csv and 777 rights are given to the media folder.

Update GeoIP Database

Import Database

Note: Importing will erase the previous import record and new record will be imported. This operation will take time to complete.

III. How to add New Currency:

Step 1 – Go to Manage:

At the backend go to “Manage”. You can go there from Admin Menu > FME EXTENSIONS. Click on “Add New” to add store information.
