## SIZE CHART

- **Size Chart Column Label:** Enter size chart column labels separated by "," i.e. XL, L, S Or upload '.CSV' file labels for size chart columns. You can create as many columns as you want by clicking on the **Add Data** button. Just click on this button & enter the name for the new column.
  - If you enter column labels or headers manually each Label must be separated by «,» & must have a unique value for example (XS, S, M, L, XL).
  - After entering labels click on the **Add Data** button to add rows and the data of the size chart. Once you clicked on the 'Add Data' button, a fieldset with a table will be displayed.
  - If you are using a **CSV** file to import the data, use the '**Choose File**' upload button to upload the CSV file. Once uploaded, it will automatically set the column labels and the rows of the size chart.
  - The data can be uploaded and edited manually or will be filled once the CSV file is uploaded.
